## Quantitative Aptitude

1. A dice is rolled three times and sum of three numbers appearing on the uppermost face is 15. The chance that the first roll was a four is

- A  $\frac{2}{5}$
- B  $\frac{1}{5}$
- C  $\frac{1}{6}$
- D None of these

2. A boat covers a distance of 30 kms downstream in 2 hours while it takes 6 hours to cover the same distance upstream. What is the speed of the boat in kms per hour?

- A 5
- B 7.5
- C 13
- D 10

3. A five digit number is formed by using the digits 1, 2, 3, 4 and 5 without repetitions. What is the probability that the number is divisible by 4?

- A  $\frac{1}{5}$
- B  $\frac{5}{6}$
- C  $\frac{4}{5}$
- D None of these

4. If the algebraic sum of deviations of 20 observations measured from 23 is 70, mean of these observations would be

- A 24
- B 25
- C 26
- D None of these

5. An alloy of gold and silver weighs 50 gms. It contains 80% gold. How much gold should be added to the alloy so that percentage of gold is increased to 90?

- A 50 gms
- B 60 gms
- C 30 gms
- D 40 gms

6. Weekly incomes of two persons are in the ratio of 7 : 3 and their weekly expenses are in the ratio of 5 : 2. If each of them saves Rs. 300 per week, then the weekly income of the first person is

- A Rs. 7500
- B Rs. 4500
- C Rs. 6300
- D Rs. 5400

7. Wheat is now being sold at Rs. 27 per kg. During last month its cost was Rs. 24 per kg. Find by how much per cent a family reduces its consumption so as to keep the expenditure fixed.

- A 10.2%
- B 12.1%
- C 12.3%
- D 11.1%

8. There are 10 stations on a railway line. The number of different journey tickets that are required by the authorities is

- A 92
- B 90
- C 91
- D None of these

9. The radius of circle is so increased that its circumference increased by 5%. The area of the circle then increases by

- A 12.5%
- B 10.25%
- C 10.5%
- D 11.25%

10. In how many ways can the letters of the word ABACUS be rearranged such that the vowels always appear together?

- A  $\frac{6!}{2!}$
- B  $3! * 3!$
- C  $\frac{(3! * 3!)}{2!}$
- D  $\frac{(4! * 3!)}{2!}$

**SNAP Mock Test**

Mocks designed exactly like the actual Exam

11. In 4 years, Rs. 6000 amounts to Rs. 8000. In what time at the same rate will Rs. 525 amount to Rs. 700?

- A 2 years
- B 3 years
- C 4 years
- D 5 years

#### Instructions [12 - 14]

At the start of a game of cards, J and B together had four times as much money as T, while T and B together had three times as much as J. At the end of the evening, J and B together had three times as much money as T, while T and B together had twice as much as J. B lost Rs. 200

12. What fraction of the total money did T have at the beginning of the game?

- A  $\frac{1}{3}$
- B  $\frac{1}{8}$
- C  $\frac{2}{9}$
- D  $\frac{1}{5}$

13. What fraction of the total money did J win/lose?

- A Won  $\frac{1}{12}$
- B Lost  $\frac{1}{6}$
- C Lost  $\frac{1}{3}$
- D Won  $\frac{1}{5}$

**SNAP Syllabus PDF**

14. What amount did B start with?

- A Rs. 575
- B Rs. 375

C Rs. 825

D Rs. 275

15. If  $a$  and  $b$  are negative, and  $c$  is positive, which of the following statement/s is/are true?

- I)  $a - b < a - c$
- II) if  $a < b$ , then  $\frac{a}{c} < \frac{b}{c}$
- III)  $\frac{a}{b} > \frac{a}{c}$

A I only

B II only

C III only

D II and III only

16. The diagonal of a square is  $4\sqrt{2}$  cm. The diagonal of another square whose area is double that of the first square is

A 8 cm

B  $8\sqrt{2}$  cm.

C  $4\sqrt{2}$  cm.

D 16 cm

17. The maximum length of a pencil that can be kept in a rectangular box of dimensions 8 cm x 6 cm x 2 cm, is

A  $2\sqrt{13}$  cm.

B  $2\sqrt{14}$  cm.

C  $2\sqrt{26}$  cm.

D  $10\sqrt{2}$  cm.

#### Instructions [18 - 19 ]

Answer the questions based on the information given below

The Venn diagram given below shows the estimated readership of 3 daily newspapers (X, Y & Z) in a city. The total readership and advertising cost for each of these papers is as below

| Newspapers | Readership (lakhs) | Advertising cost (Rs. per sq. cm) |
|------------|--------------------|-----------------------------------|
| X          | 8.7                | 6000                              |
| Y          | 9.1                | 6500                              |
| Z          | 5.6                | 5000                              |

The total population of the city is estimated to be 14 million. The common readership (in lakhs) is indicated in the given Venn diagram

18. The number of people (in lakhs) who read at least one newspaper is

- A 4.7
- B 11.9
- C 17.4
- D 23.4

19. The number of people (in lakhs) who read only one newspaper is

- A 4.7
- B 11.9
- C 17.4
- D 23.4

## SNAP Online Coaching

20. Sonali invests 15% of her monthly salary in insurance policies. She spends 55% of her monthly salary in shopping and on household expenses. She saves the remaining amount of Rs. 12,750. What is Sonali's monthly income?

- A Rs. 42,500
- B Rs. 38,800
- C Rs. 40,000
- D Rs. 35,500

21. How many kgs of tea worth Rs. 25 per kg must be blended with 30 kgs of tea worth Rs. 30 per kg so that by selling the blended variety at Rs. 30 per kg there should be a gain of 10%?

- A 36 kgs
- B 40 kgs
- C 32 kgs
- D 42 kgs

22. In an examination, out of 480 students 85% of the girls and 70% of the boys passed. How many boys appeared in the examination if total pass percentage was 75%?

- A 370
- B 340
- C 320
- D 360

[VIDEO SOLUTION](#)

## SNAP Previous Papers

with detailed video solutions and analysis

23. 300 gms of salt solution has 40% salt in it. How much salt should be added to make it 50% in the solution?

- A 40 gms
- B 60 gms
- C 70 gms
- D 80 gms

24. What number should replace the question mark in the image below?

|    |    |     |
|----|----|-----|
| 6  | 12 | ?   |
| 48 | 96 | 192 |

- A 18
- B 20
- C 22
- D 24

25. What image from bottom row should replace the question mark?

- A 4  
 B 6  
 C 1  
 D none

## SNAP Mock Test

Mocks designed exactly like the actual Exam

26. A five-digit number divisible by 3 is to be formed using numerical 0, 1, 2, 3, 4 and 5 without repetition. The total number of ways this can be done is:

- A 122  
 B 210  
 C 216  
 D 217

27. A contract is to be completed in 50 days and 105 men were set to work, each working 8 hours a day. After 25 days,  $\frac{2}{5}$ th of the work is finished. How many additional men be employed so that the work may be completed on time, each man now working 9 hours a day?

- A 34  
 B 36  
 C 35  
 D 37

28. A can built up a structure in 8 days and B can break it in 3 days. A has worked for 4 days and then B joined to work with A for another 2 days only. In how many days will A alone build up the remaining part of the structure?

- A 10 days  
 B 9 days  
 C 12 days

- D None of these

## SNAP Syllabus PDF

29. The first two terms of a geometric progression add up to 12. The sum of the third and the fourth terms is 48. If the terms of the geometric progression are alternately positive and negative, then the first term is

- A -2
- B -4
- C -12
- D 8

30. The mean of the numbers a, b, 8, 5, 10 is 6 and the variance is 6.80. Then which one of the following gives possible values of a and b?

- A a = 0, b = 7
- B a = 5, b = 2
- C a = 3, b = 4
- D a = 2, b = 4

31. An agent sells goods of value of Rs. 15,000. The commission which he receives at the rate of  $12\frac{1}{2}\%$  is

- A Rs. 1875
- B Rs. 2125
- C Rs. 2000
- D Rs. 2700

## SNAP Crash Course

32.  $\sqrt{110.25} \times \sqrt{0.01} \div \sqrt{0.0025} - \sqrt{420.25}$  equal to

- A 0.75
- B 0.50
- C 0.64
- D 0.73

### Instructions [33 - 35]

The table below shows the number of people who responded to a survey about their favourite style of music. Use this information to answer the following questions to the nearest whole percentage.

| <b>Age</b> | <b>15-20</b> | <b>21-30</b> | <b>31+</b> |
|------------|--------------|--------------|------------|
| Classical  | 6            | 4            | 17         |
| Pop        | 7            | 5            | 5          |
| Rock       | 6            | 12           | 14         |
| Jazz       | 1            | 4            | 11         |
| Blues      | 2            | 3            | 15         |
| Hip-Hop    | 9            | 3            | 4          |
| Ambient    | 2            | 2            | 2          |
| Total      | 33           | 33           | 68         |

33. What percentage of respondents under 31 indicated that Blues is their favourite style of music?

- A 7.1
- B 7.6
- C 8.3
- D 14.1

34. What percentage of respondents aged 21-30 indicated a favourite style other than Rock music?

- A 64%
- B 60%
- C 75%
- D 36%

35. What percentage of the total sample indicated that Jazz is their favourite style of music?

- A 6%
- B 8%
- C 22%
- D 12%

#### Instructions [36 - 40 ]

The pie charts below show the percentage of students in each faculty at North West University and the number of non-US students in the Arts faculty. These percentages have been rounded to the nearest whole number. There are a total of 1049 students in Arts faculty. Use this information to answer the following questions.

36. What percentage of students in the Arts faculty are non-US students?

- A 14%
- B 9%
- C 30%
- D 11%

37. How many students are there in the Engineering faculty?

- A 420
- B 410
- C 390
- D 440

38. How many students are there at the University?

- A 4650
- B 4560
- C 4640

D 4450

39. If six percent of Science students are Asian. How many Asian students are studying Science?

A 48

B 66

C 120

D 57

40. There are 34 European medical students. What percentage of the faculty does this represent?

A 14%

B 18%

C 16%

D 15%

## Reasoning

41. There are 3 societies A, B, C having some tractors each. A gives B and C as many tractors as they already have. After some days B gives A and C as many tractors as they have. After some days C gives A and B as many tractors as they have. Finally each has 24 tractors. What is the original No. of tractors each had in the beginning?

A A-29, B-21, C-12

B A-39, B-21, C-12

C A-21, B-12, C-29

D A-21, B-12, C-39

42. Although most of the fastest growing jobs in today's economy will require a college degree, many of the new jobs being created from home health aide to desktop publisher require knowledge other than gained from earning a degree. For workers in those jobs, good basic skills in reading, communication, and mathematics play an important role in getting a job and developing a career.  
From the information given above it can be validly concluded that, in today's economy

- A skills in reading, communication and mathematics play an important role in developing a career as a desktop publisher.
- B the majority of the new jobs being created require knowledge other than that gained from earning a college degree

- C a job as a home health aide will rely more on communication skills than on basic skills in reading and mathematics
- D if a job is one of the fastest growing jobs, it will require a college degree.
- 43.** According to the National Agricultural Aviation Society (NAAS), without the use of crop protection products to control insects, weeds, and diseases, crop yields per acre will drop by more than 50 percent. The first aerial application of insecticide occurred in 1921, and it was a huge success. By contrast, in today's economy all aircraft that are classified as aerial applicators do more than just apply insecticide; today, they also spread seeds and apply fertilizer.  
From the information given above it CANNOT be validly concluded that
- A according to the NAAS, if crop yields per acre never drop by more than 50 percent, then crop protection products have been used to control insects, weeds, and diseases.
  - B in today's economy any aircraft that cannot be used to apply fertilizer cannot be classified as an aerial applicator
  - C in today's economy, if an aerial applicator is used, then it will be able to spread seed and to apply fertilizer
  - D according to the NAAS, if crop yields per acre drop by more than 50 percent, then crop protection products have not been used to control insects, weeds, and diseases.

- 44.** Lou observes that if flight 409 is cancelled, then the manager could not possibly arrive in time for the meeting. But the flight was not cancelled. Therefore, Lou concludes, the manager will certainly be on time. Evelyn replies that even if Lou's premises true, his argument is fallacious. And therefore, she adds, the manager will not arrive on time after all.

Which of the following is the strongest thing that we can properly say about this discussion?

- A Evelyn is mistaken in thinking Lou's argument to be fallacious, and so her own conclusion is unwarranted.
- B Evelyn is right about Lou's argument, but nevertheless her own conclusion is unwarranted.
- C Since Evelyn is right about Lou's argument, her own conclusion is well supported.
- D Since Evelyn is mistaken about Lou's argument, her own conclusion must be false.

- 45.** Cars are safer than planes. Fifty percent of plane accidents result in death, while only one percent of car accidents result in death. Which of the following, if true, would most seriously weaken the argument above?
- A Planes are inspected more often than cars.
  - B The number of car accidents is several hundred thousand times higher than the number of plane accidents.
  - C Pilots never fly under the influence of alcohol, while car drivers often do.
  - D Plane accidents are usually the fault of air traffic controllers, not pilots.

#### Instructions [46 - 48 ]

Refer to the chart below showing annual production and answer the questions that follow.

46. Which industry /industries contribute /contributes to company S?

- A Industry A and B only
- B B and C only
- C A and C only
- D B only

47. Industry B processes what percentage of the total production of listed elements?

- A 25%
- B 65%
- C 40%
- D Cannot be determined

48. Of the listed elements processed by the Industry A, how many tons are produced annually?

- A 30,000
- B 50,000
- C 1,00,000
- D 55,000

#### Instructions [49 - 52]

In each of the following questions there are two blanks marked I & II. The words to fill in these blanks are given against I as (A, B, C, D) and II as (P, Q, R, S) RESPECTIVELY. The right words to fill in these blanks are given as four alternatives. The words on either side of the sign (:) have a similar relationship. That alternative which signifies this relationship is your answer.

49. I : Increase :: Descend : II

- I. (A) Grow (B) Ascend (C) Rise (D) Price
- II. (P) Reduce (Q) Down (R) Decrease (S) Mountain

- A AR
- B RB
- C CP
- D DQ

50. Modern : I :: II : Old

- I. (A) Ancient (B) Death (C) Famous (D) Civilization
- II. (P) Industrialisation (Q) Young (R) Fashion (S) Western

- A AQ
- B AS
- C BP
- D CR

51. Part : I :: Class : II

- I. (A) Section (B) Whole (C) School (D) Students
- II. (P) Student (Q) School (R) Teachers (S) Room

- A AR
- B BQ
- C CP
- D DS

52. Summit : Apex :: I : II

- I. (A) beautiful (B) Picture (C) Attractive (D) Enhancing
- II. (P) Comfortable (Q) Pretty (R) Healthy (S) Brave

- A AQ
- B BP
- C DS
- D CR

53. If in a certain code BEAUTIFUL is coded as 573041208, BUTTER as 504479, how is FUTURE coded in that code?

- A 201497
- B 204097
- C 704092

**SNAP Mock Test**

Mocks designed exactly like the actual Exam

54. How many Mondays are there in particular month of a particular year if the month ends on Wednesday?

- A 4
- B 5
- C 3
- D Cannot be specified

**Instructions [55 - 56 ]**

There are two rows of numbers in each question. The upper row is complete and in the lower row one number is missing. Find a suitable number to fill the blank space so that the symmetry with the upper row is maintained.

55.

|    |     |    |
|----|-----|----|
| 17 | 102 | 12 |
| 15 | ?   | 10 |

- A 211
- B 75
- C 125
- D 117

56.

|    |     |    |
|----|-----|----|
| 12 | 336 | 14 |
| 15 | ?   | 16 |

- A 220
- B 480
- C 125
- D 450

## SNAP Syllabus PDF

**Instructions [57 - 58 ]**

Seven People A, B, C, D, E, F, G are planning to enjoy boating. There are only two boats, and the following conditions are to be kept in mind.

- (I) A will go in the same boat in which E is to go.
- (II) F cannot go in the same boat in which C is, unless D is also accompanying.
- (III) Neither B nor C can be given the boat in which G is.
- (IV) The maximum number of persons in one boat can be four only.

57. If F and B are in one boat, which of the following statements is true?

- A G is in the other boat
- B D is in the other boat
- C C is in the other boat
- D E is with F and B in one boat

**58.** If E gets the boat with F, which of the following is the complete and accurate list of the people who must be sitting in other boat?

- A F and E
- B G and A
- C D and A
- D C, D and B

**Instructions [59 - 60 ]**

- A Metaphor
- B Simile
- C Apostrophe
- D Epigram

107. Death lays his icy hand on kings.

- A Personification
- B Exclamation
- C Simile
- D Anticlimax

#### Instructions [108 - 110 ]

Read the passage carefully and answer within the context.

"A way to deal with frozen feelings"

Every child experiences all that happens around him with total awareness. In the first seven years the child's brain is like a sponge, taking in all sensory inputs and building his idea of his surroundings. As long as the environment is safe, the child learns with incredible speed. However, when the environment is scary or stressful, the child unlearns past learning just as rapidly.

In the early years of every child's life, whenever there is shock, violence, fear or pain, these intense emotions are imprinted deeply into memory. Whenever the same activity or situation is repeated, the nervous system and body subconsciously re-experience the memory of that trauma.

Any emotional situation that takes us out of the present and into the past means that whenever the same kind of emotion crops up later in our life we return to the past for our reference point. If that point was at age three, we find ourselves behaving like a three-year-old. We feel childish and we behave childishly. Our feelings are the cause of this 'glitch' in our learning process. We know we should be able to make a positive change, but that doesn't change anything.

The process of change need not be traumatic. We couldn't have done any better because we didn't know how to. But we should realise that was then and this is now! We can choose to choose again. It's up to us. It's our movie!

**108.** The "Frozen Feelings" being talked about are about

- A negative childhood experiences
- B childhood learning patterns
- C inability to learn as an adult
- D none of the above.

**109.** A 'glitch' is

- A a ditch
- B uneasy emotions

# Explanations

## Quantitative Aptitude

### 1. B

There are three possibilities for sum of uppermost faces of dice is equal to 15. They are

5, 5, 5 - only 1 arrangement

4, 5, 6 -  $3! = 6$  arrangements

3, 6, 6 -  $\frac{3!}{2} = 3$  arrangements

Out of these 10 arrangements, there are 2 cases in which 4 occurs in first roll ( 4,5,6 or 4,6,5)

Therefore, probability =  $\frac{2}{10} = \frac{1}{5}$

Answer is option B.

### 2. D

Let speed of boat be V and speed of stream be U

so as per case 1

Downstream i.e  $V+U = 30/2 = 15$

And Upstream i.e  $V-U = 30/6 = 5$

Now adding

we get  $2V = 2$

$V = 10$

### 3. A

For a number to be divisible by 4, last 2 digits must be divisible by 4

Last 2 digits can be 12, 24, 32, 52

— — — — —

Last 2 digits have 4 possibilities and remaining digits can be arranged in  $3!$  ways

Number of 5 digit numbers divisible by 4 are  $3! \times 4 = 24$

Total number of 5 digit numbers that can be formed =  $5!$

Therefore, probability =  $\frac{24}{5!} = \frac{1}{5}$

Answer is option A.

### 4. D

Sum of observation is given as = 70

Number of observation = 20

Therefore, Mean =  $70/20=3.5$

But, here observation starts from 23.

Therefore, Mean =  $23 + 3.5 = 26.5$

### 5. A

Gold in 50g of alloy

$$= 80 \times \frac{50}{100} = 40g$$

Let  $x$  g gold must be added.

Now, according to the question,

$$40 + x = \frac{90}{100} (50 + x)$$

$$x = 50g$$

Thus, 50 g of gold must be added to it to get 90%.

Thus, the correct option is A.

#### 6. C

Let the incomes of two persons are  $7x$  and  $3x$

Expenditure of first person =  $7x - 300$

Expenditure of second person =  $3x - 300$

According to the question,

$$7x - 300 / 3x - 300 = 5/2$$

$$\Rightarrow 14x - 600 = 15x - 1500$$

$$x = 900$$

Income of first person

$$= 7x = 7 \times 900 = \text{RS.}6300$$

#### 7. D

Old price of rice = Rs.24/k

New price of rice = Rs.27 per/kg

Therefore, Increase in price of rice = New price - Old price =  $27 - 24 = \text{Rs.}3/\text{kg}$

Therefore, Increased percentage in price

$$= 3/24 \times 100 = 12.5\%$$

Now, reduction in consumption, so as to keep the expenditure fixed.

According to the formula,

$$\begin{aligned} & \frac{a}{100+a} \times 100 \\ &= \frac{12.5}{100+12.5} \times 100 \\ &= 11.1\% \end{aligned}$$

#### 8. B

The number of different journey tickets that are required by the authorities = The number of selecting 2 stations

$\times 2$  (For every pair of stations, say A and B, there are two tickets required A to B and B to A)

$$= {}^{10}C_2 \times 2 = 90$$

#### 9. B

We know that Circumference is dependent linearly on radius

so if circumference is increased by 5%, we can conclude radius is increased by 5%

Now Area varies directly with square of radius

Now if r is changed to  $1.05r$

so  $r^2$  will change to  $(1.05r)(1.05r) = 1.1025 r^2$

So we can conclude area will change by 10.25%

#### 10. D

ABACUS

Vowels = AAU

Remaining BCS

Now AAU will be considered 1 and B,C,S separate

so these can be arranged in  $4!$  ways  
Vowels AAU can be arranged in  $3!/2!$  ways  
so total arrangements =  $\frac{4! \times 3!}{2!}$

## SNAP Syllabus PDF

### 11.C

$$A=P+SI$$

We get  $SI = 2000$

$$2000 = (6000 * R * 4) / 100$$

$$\text{we get } R = 25/3 \%$$

Now

$$P = 525$$

$$A = 700$$

$$\text{So } SI = 175$$

$$175 = (525 * 25/3 * T) / 100$$

$$\text{We get } T = 4 \text{ years}$$

#### Explanation [12 - 14]:

Let the initial amount with them be

$$J_1, B_1 \text{ and } T_1$$

Now as per given

$$J_1 + B_1 = 4T_1 \quad (1)$$

$$T_1 + B_1 = 3J_1 \quad (2)$$

Total amount with them will be  $4J_1$  or  $5T_1$

Now Let final amounts with them be  $J_2, B_2$  and  $T_2$  respectively.

$$J_2 + B_2 = 3T_2 \quad (3)$$

$$T_2 + B_2 = 2J_2 \quad (4)$$

Total amount with them will be  $4T_2$  or  $3J_2$

$$\text{Now } 5T_1 = 4T_2 = 4J_1 = 3J_2$$

From (1)

$$B_1 = 4T_1 - J_1$$

$$= 4T_1 - 5/4 T_1$$

$$= 11/4 T_1$$

$$B_2 = 3T_2 - J_2$$

$$= 3T_2 - 4/3 T_2$$

$$= 5/3 T_2$$

$$5/3 (5/4) T_1$$

$$= 25/12 T_1$$

$$\text{Now } B_1 - B_2 = 11/4 T_1 - 25/12 T_1 = 200$$

$$\text{so we get } 8/12 T_1 = 200$$

$$\text{we get } T_1 = 300$$

$$\text{so } B_1 = 11/4 (300) = 825$$

$$B_2 = 25/12 (300) = 625$$

$$T_2 = 5/4(300) = 375$$

$$J_1 = 375$$

$$J_2 = 4/3 (375) = 500$$

$$\text{Total money} = 825 + 375 + 300 = 1500$$

### 12.D

Money T had with respect to total =  $300/1500 = 1/5$

**Alternative solution:**

It is given that the J and B had 4 times the money as T(in the beginning). Thus, if T had  $x$  amount with him, the total amount with them will be  $5x$ .

So, let's assume that the total amount with them is  $60x$ (LCM of 5, 4, and 3).

**In the beginning:** Now, the amount with T will be  $12x$ , and the sum of the amount with J and B will be  $48x$ .

Since the amount with T and B is 3 times that with J, the amount with J will be  $15x$ . Thus, the amount with B will be  $33x$ .

**At the end:** Since the amount with J and B is three times that of T, T will have  $15x$  at the end. Also, the amount with T and B is twice that of J; the amount with J will be  $20x$ . Thus, B will have  $25x$  at the end.

Now, the ratio of money with T in the beginning with respect to the total amount =  $\frac{12x}{60x} = \frac{1}{5}$

Thus, the correct option is D.

**13. A**

$$/ > J \text{ won} : 500 - 375 = 125$$

$$\text{So fraction} = 125/1500 = 1/12$$

**Alternative solution:**

It is given that the J and B had 4 times the money as T(in the beginning). Thus, if T had  $x$  amount with him, the total amount with them will be  $5x$ .

So, let's assume that the total amount with them is  $60x$ (LCM of 5, 4, and 3).

**In the beginning:** Now, the amount with T will be  $12x$ , and the sum of the amount with J and B will be  $48x$ .

Since the amount with T and B is 3 times that with J, the amount with J will be  $15x$ . Thus, the amount with B will be  $33x$ .

**At the end:** Since the amount with J and B is three times that of T, T will have  $15x$  at the end. Also, the amount with T and B is twice that of J; the amount with J will be  $20x$ . Thus, B will have  $25x$  at the end.

Now, the difference between the money with J in the beginning and at the end =  $20x - 15x = 5x$

Thus, the required ratio =  $\frac{5x}{60x} = \frac{1}{12}$

Thus, the correct option is A.

**14. C**

Let the initial amount with them be

$J_1, B_1$  and  $T_1$

Now as per given

$$J_1 + B_1 = 4T_1 \quad (1)$$

$$T_1 + B_1 = 3J_1 \quad (2)$$

Total amount with them will be  $4J_1$  or  $5T_1$

Now Let final amounts with them be  $J_2, B_2$  and  $T_2$  respectively .

$$J_2 + B_2 = 3T_2 \quad (3)$$

$$T_2 + B_2 = 2J_2 \quad (4)$$

Total amount with them will be  $4T_2$  or  $3J_2$

$$\text{Now } 5T_1 = 4T_2 = 4J_1 = 3J_2$$

From (1)

$$B_1 = 4T_1 - J_1$$

$$= 4T_1 - \frac{1}{5}T_1$$

$$= \frac{11}{4}T_1$$

$$B_2 = 3T_2 - J_2$$

$$= 3T_2 - \frac{3}{4}T_2$$

$$= \frac{9}{4}T_2$$

$$= \frac{5}{3}T_2$$

$$= \frac{5}{3}(\frac{4}{5}T_1)T_2$$

$$= \frac{25}{12}T_1$$

$$\text{Now } B_1 - B_2 = \frac{11}{4}T_1 - \frac{25}{12}T_1 = 200$$

so we get  $\frac{8}{12}T_1 = 200$

we get  $T_1 = 300$   
 so  $B_1 = 11/4 (300) = 825$   
 $B_2 = 25/12 (300) = 625$   
 $T_2 = 5/4(300) = 375$   
 $J_1 = 375$   
 $J_2 = 4/3 (375) = 500$   
 So B started with Rs 825

#### Alternative solution:

It is given that the J and B had 4 times the money as T(in the beginning). Thus, if T had  $x$  amount with him, the total amount with them will be  $5x$ .

So, let's assume that the total amount with them is  $60x$ (LCM of 5, 4, and 3).

**In the beginning:** Now, the amount with T will be  $12x$ , and the sum of the amount with J and B will be  $48x$ .

Since the amount with T and B is 3 times that with J, the amount with J will be  $15x$ . Thus, the amount with B will be  $33x$ .

**At the end:** Since the amount with J and B is three times that of T, T will have  $15x$  at the end. Also, the amount with T and B is twice that of J; the amount with J will be  $20x$ . Thus, B will have  $25x$  at the end.

Now, the difference of money with B in the beginning and in the end =  $33x - 25x = 8x$

Since B lost Rs 200 during the game,  $8x = 200$

Thus,  $x = 25$

So, the amount with B, in the beginning =  $33 \times 25 = 825$

Thus, the correct option is C.

#### 15.D

I)  $a - c$  is negative as  $a$  is negative and  $c$  is positive. Thus, the value of  $a - c$  will be smaller than  $a$ (since more negative is added to a negative number).  $a - b$  can be negative or positive depending upon the value of  $a$  and  $b$ , but it can be concluded that this number will be greater than  $a$ (since a positive number is added to a negative number). Thus,  $(a - c) < (a - b)$ . Thus, the statement I is false.

II) Given  $a < b$ ,  $\frac{a}{c} < \frac{b}{c}$  as  $c$  is positive and  $a < b$ . Therefore, statement II is true

III)  $a$  is negative and  $b$  is negative, this implies  $\frac{a}{b}$  is positive.  $a$  is negative and  $c$  is positive, this implies  $\frac{a}{c}$  is negative. Therefore,  $\frac{a}{b} > \frac{a}{c}$ . Statement III is true

Answer is option D

#### 16.A

The diagonal of the first square is  $4\sqrt{2}$

Now we know if side of a square is  $a$

then diagonal is  $a\sqrt{2}$

Therefore here  $a = 4$

Now area = 16

Now area of second square =  $2(16) = 32$

Now therefore side of 2nd square =  $\sqrt{32} = 4\sqrt{2}$

Now therefore diagonal will be :  $4\sqrt{2} (\sqrt{2}) = 8$

#### 17.C

The maximum length of pencil will be along the longest diagonal of box

so we can say the maximum length will be :  $\sqrt{4^2 + 6^2 + 8^2} = \sqrt{104} = 2\sqrt{26}$

18.C

$$\text{Now } X = 8.7 - 2.5 - 0.5 - 1 = 4.7$$

$$Y = 9.1 - 2.5 - 0.5 - 1.5 = 4.6$$

$$Z = 5.6 - 1 - 1.5 - 0.5 = 3.1$$

Now at least 1 will be

$$4.7 + 4.6 + 3.1 + 2.5 + 1 + 1.5 + 0.5 = 17.4$$

19.B

Given Readership of newspaper X = 8.7

$$\text{only } X + 2.5 + 0.5 + 1 = 8.7$$

$$\text{only } X = 4.7$$

Given Readership of newspaper Y = 9.1

$$\text{only } Y + 2.5 + 1.5 + 0.5 = 9.1$$

$$\text{only } Y = 4.6$$

Given Readership of newspaper Z = 5.6

$$\text{only } Z + 0.5 + 1 + 1.5 = 5.6$$

$$\text{only } Z = 2.6$$

Number of people who read only one newspaper =  $4.7 + 4.6 + 2.6 = 11.9$  lakhs

20.A

Let Sonali's monthly income be  $100x$

Now Expenditure on insurance policies =  $15x$

Expenditure on shopping and household expenses =  $55x$

Therefore remaining amount =  $100x - 55x - 15x = 30x$

Which is equal to 12,750

Now therefore  $30x = 12,750$

$$x = 425$$

Therefore total income =  $100x = 42,500$

**SNAP Online Coaching**

21.A

Let the quantity of tea worth Rs.25 be  $x$  kg.

Now as per given

$$(25x + 30 \times 30) \times 110 / 100 = 30(30+x)$$

$$(275x+9900) = (9000+300x)$$

$$300x - 275x = 900 \Rightarrow x = 900/25$$

Therefore,  $x = 36$  kg.

22. C

Total number of students = 480

Percentage of total students passed

$$= 75\% \text{ of total student} = 75 \times 480 / 100 = 360 \text{ student}$$

Now, using the condition from the question,

Let the number of boys be  $x$

$$\text{Then, } 70\% \text{ of } x + 85\% \text{ of } (480 - x) = 360$$

$$\Rightarrow 70x/100 + 85(480-x)/100 = 360$$

$$\Rightarrow 70x - 85x + 40800 = 36000$$

$$\Rightarrow 40800 - 36000 = 85x - 70x$$

$$\Rightarrow 4800 = 15x$$

$$\Rightarrow x = 4800/15 = 320$$

There are 320 boys who have appeared for the examination.

 VIDEO SOLUTION

23. B

300 gms of solution has 40% salt

$$\text{so the amount of salt} = 300(0.4) = 120$$

Now let salt added be  $x$

$$\text{So we get } 120+x/300+x = 1/2$$

$$\text{we get } 240+2x = 300+x$$

$$\text{we get } x = 60$$

24. D

Lower number is eight times the upper number, i.e.

$$6 \times 8 = 48$$

$$12 \times 8 = 96$$

$$y \times 8 = 192$$

$$y = \frac{192}{8} = 24$$

Answer is option D.

25. B

Images are shifting by one position to the left side. In each step, there are two shaded and one unshaded image. Therefore, shaded triangle with index C at upper vertex will fill the blank.

Image 6 is suitable image and answer is option B.

SNAP Previous Papers  
with detailed video solutions and analysis

26. C

Let us observe the digits given to us, we have 0,1,2,3,4 and 5, to make a five digit number we only need 5 digits out of the given 6 digits,

Case 1: Using digits 0,1,2,4 and 5.

The number of ways in which we can arrange these 5 digits are  $\Rightarrow 4 \times 4 \times 3 \times 2 \times 1$

$$\Rightarrow 96$$

Case 2: Using the digits 1,2,3,4 and 5

The number of ways in which we can arrange these 5 digits are  $\Rightarrow 5 \times 4 \times 3 \times 2 \times 1$

$$\Rightarrow 120$$

Therefore, the total number of cases =  $96+120=216$

### 27.C

It is given that in the initial 25 days, the work done by 105 men was  $(2/5)^{th}$  of the total work.

Thus, the total work left is  $(3/5)^{th}$  of the total work.

MDH/W is constant

so we get

$$\frac{105 \times 25 \times 8}{\frac{2W}{5}} = \frac{M \times 25 \times 9}{\frac{3W}{5}}$$

We get M = 140

So additional men =  $140-105 = 35$

### 28.D

Let the total work be 24 units

So we can say work done by A will be +3 units / day

and work done by B will be -8 units/day

Now as per the given condition :

work done by A in 4 days =  $3(4) = 12$  units

Now, both worked for 2 days:

so work done will be  $(3-8)(2) = -10$  units

Now the net work will be  $12-10 = 2$  units

Now remaining work  $24-2 = 22$  units

Therefore A will complete this in  $22/3 = 7\frac{1}{3}$  days

### 29.C

Let the first term of the geometric progression be a and common ratio be r

Now as per given condition :

$$a + ar = a(1 + r) = 12 \quad (1)$$

$$ar^2 + ar^3 = 48 \quad (2)$$

$$\text{we get } ar^2(1 + r) = 48 \quad (3)$$

Dividing (1) and (3)

we get :

$$1/r^2 = 1/4$$

$$\text{we get } 1/r = 1/2 \text{ or } -1/2$$

but since terms are alternatively positive and negative

$$\text{we get } r = -2$$

Substituting r value in Eq. 1,

$$\text{we get } a(-1) = 12$$

$$\text{we get } a = -12$$

### 30.C

We are given that :

The mean of the numbers a, b, 8, 5, 10 is 6 and the variance is 6.80

Now taking mean

$$\text{we get } 30 = a + b + 8 + 5 + 10$$

$$\text{so we get } a + b = 7 \quad (1)$$

Now variance = 6.80

$$\text{so } 6.80 = ((a - 6)^2 + (b - 6)^2 + (8 - 6)^2 + (5 - 6)^2 + (10 - 6)^2)/5$$

$$\text{we get } 6.8(5) = (a - 6)^2 + (b - 6)^2 + 1 + 16 + 4$$

$$\text{So we get } 13 = (a - 6)^2 + (b - 6)^2$$

$$a = 7 - b$$

$$\text{we get } 13 = (1 - b)^2 + (b - 6)^2$$

we get  $b = 4$

and so  $a = 3$

The banner features two people standing side-by-side, both wearing black t-shirts with the "cracku" logo. The background is light blue with a small tree icon in the top left corner. The main title "SNAP Mock Test" is in large, bold, blue letters. Below it, a smaller orange box contains the text "Mocks designed exactly like the actual Exam". In the top right corner, there's a small "cracku" logo with a graduation cap icon.

**31.A**

The commission amount will be :

$$15,000 \left( \frac{12.5}{100} \right)$$

$$= 15,000 \left( \frac{25}{200} \right)$$

$$= \text{Rs } 1875$$

**32.B**

We have :

$$\sqrt{\frac{11025}{100}} \times \sqrt{\frac{1}{100}} \div \sqrt{0.0025} = \sqrt{420.25}$$

Using BODMAS, we get

$$= 10.5 \times \frac{0.1}{0.05} - \sqrt{\frac{42025}{100}}$$

$$= 21 - 20.5$$

$$= 0.5$$

**33.B**

Total number of respondents under 31 = 66

Total number of persons who liked blue = 3+2 = 5

So in percentage we get  $(5/66)(100) = 7.6$

**34.A**

Total respondents in 21-30 = 33

Respondents liking Rock = 12

So respondents liking other = 33-12 = 21

Therefore in percentage :  $(21/33)*100 = 64\%$

**35.D**

Total number of people liking Jazz = 16

Total sample = 68+66 = 134

So percentage =  $(16/134)(100) = 12\%$

The banner features a circular icon on the left containing a stylized lightbulb and books. The main title "SNAP Syllabus PDF" is in large, bold, white letters. On the right, there is a small "cracku" logo with a graduation cap icon and a "PDF" icon showing a red document symbol.

**36.D**

Total students in Arts faculty = 1049

Total non US students in arts faculty =  $79+21+6+2+4 = 112$

Now in percentage

We get :  $\frac{112}{1049} \times 100 = 11\%$

**37.B**

Let the total number of students be  $x$

Now it is given that 1049 students are in arts which is 23%

so we can say

$x(23/100) = 1049$

We get  $x = 4560$

Now Engineering faculty = 9%

so we get number =  $(0.09)(4560) = 410$

38. **B**

Let the total number of students be  $x$

Now it is given that 1049 students are in arts which is 23%

so we can say

$$x(23/100) = 1049$$

We get  $x = 4560$

39. **D**

Let the total number of students be  $x$

Now it is given that 1049 students are in arts which is 23%

so we can say

$$x(23/100) = 1049$$

We get  $x = 4560$

Now students studying science will be  $4560(21/100) = 957$

Now Asian students are studying Science will be 6% of total science

$$= 0.06(957)$$

$$= 57$$

40. **D**

Let the total number of students be  $x$

Now it is given that 1049 students are in arts which is 23%

so we can say

$$x(23/100) = 1049$$

We get  $x = 4560$

Now we know that medical students = 5%

So number of medical students :  $4560(0.05) = 228$  students

Now out of this 34 students are European

So percentage of these with respect to total =  $\frac{34}{228} \times 100 = 15\%$

Reasoning

41. **B**

Let the no. of tractors with A, B, and C be  $a$ ,  $b$ , and  $c$  respectively.

After A gives out tractors to both B and C, the number of tractors with B becomes  $2b$  and that with C becomes  $2c$ . The remaining tractors with A becomes  $a-(b+c)$ .

After B's turn to give out tractors, A has  $2(a-(b+c))$ , C has  $2(2c) = 4c$ , and B will be left with  $2b-(a-b-c)-2c$  tractors.

Finally after C's turn, A has  $4(a-(b+c)) = 4(a-b-c)$  tractors, B has  $4b-2(a-b-c)-4c = 4b-2a+2b+2c-4c = 6b-2a-2c$  tractors. And C is left with  $4c-2(a-b-c)-(2b-(a-b-c)-2c) = 4c-2a+2b+2c-(2b-a+b+c-2c) = 4c-2a+2b+2c-2b+a-b+c = -a+b+7c$  tractors

It is given that they are all left with 24 tractors in the end.

For A,  $4(a-b-c)=24$

$$\Rightarrow a-b-c=6$$

$$\Rightarrow a=6+b+c.$$

For B,  $6b-2a-2c=24$

$$\Rightarrow 3b-a-c=12$$

=>3b-6-b-c-c=12

=>2b-2c=18

=>b-c=9

=>b=c+9.

For C, -a-b+7c=24

=>-6-b-c-c-9+7c=24

=>5c-b=39

=>5c-c-9=39

=>4c=48

∴ c=12.

b=c+9

∴ b=21.

a=6+b+c

=> a= 6+21+12

∴ a=39.

**42. A**

The second line of the passage discusses about job requirements for the desktop publisher role. It clearly says that the good basic skills in reading, communication, and mathematics play an important role to develop a career there. Hence, option A.

**43. D**

In the given passage, it is given that according to NAAS, without the use of crop protection products to control insects, weeds, and diseases, crop yields per acre will drop by more than 50 percent. i.e. If the crop protection products are not used, then the crop yields will fall by more than 50 percent. However, we cannot be sure about its reverse. Hence, we can eliminate Option A. Option D is in line with this.

**44. B**

Lou subjects the arrival of his manager on time on the basis of only 1 factor. There might be other factors that can affect the manager's reaching on time, for example, delay in baggage claims, Traffic jams, etc. Hence, Evelyn is right when she says Lou's argument to be fallacious. However, concluding that the manager will not be on time on the basis of Lou's argument is absurd and unwarranted. Hence, Option b is the correct one here.

**45. B**

The argument presented is that Cars are safer than planes supported with the data given. And we need to weaken this argument.

In Option B, if we assume the number of plane accidents to be x. Then as per the data provided in the question, the number of deaths due to plane accident becomes  $x/2$ .

And if we consider number of car accidents to be  $100,000x$ . The number of deaths because of car accident becomes 1% of  $100,000x$ , which is  $1000x$ , which is way greater than that caused by planes( $x/2$ ). This clearly shows that cars are not safer than Planes.

Hence, this weakens the main argument and is our final answer.

**46. D**

Only B contributes to company S .

**47. B**

$25+40=65\%$  of the total production of listed elements is processed by B

48. C

% Production for industry A is =  $10+10+15+20+40+5 = 100\%$

100% production corresponds to 100000 tons.

49. B

The antonyms of Increase and descend are decrease and ascend respectively. Hence, they are the perfect words to fulfil the analogy.

∴ Option B- RB

50. A

Going by the options, Option A will give Modern: Ancient:: Young: Old, which seems okay, because of the antonym pairs used for analogy.

Option B gives us, Modern: Ancient:: Western:Old. Here, Western and Old seems an absurd pair and not related as Modern and Ancient. Therefore, we eliminate this.

Option C is vague as it gives out of context pairs in the form of Modern: Death:: Industrialisation: Old.

Option D can also be eliminated as Modern: Famous:: Fashion: Old makes no sense.

Hence, option A is the final answer.

51. B

A part is a part/fraction of a whole, and in the same way a class is a part of a school.

Hence, Option B makes sense and is our answer.

52. A

Summit and apex are synonymous to each other, and therefore we need to pick a pair of synonyms to match the analogy. Going by the options, only option A wherein Beautiful and pretty suffices the analogy.

53. B

With close observations, we can see that each letter has a particular digit associated with it.

B-5

E-7

A-3

U-0

T-4

I-1

F-2

L-8

R-9.

∴ FUTURE will be coded as 204097, which is given in Option B.

54. D

There can be 28(February in a Non-Leap year), 29 (February in a Leap year), 30 and 31 days in a month.

For 28 days, if a month ends in a Wednesday, there are 4 days each of Monday, Tuesday, Wednesday, Thursday, Friday, Saturday and Sunday.

For 31 days, if a month ends in a Wednesday, we have 5 days each of Monday, Tuesday and Wednesday after distributing 28 days equally to the 7 days.

Therefore, if the month is not specified, we can have both 4 and 5 Mondays in a month. hence, option D.

55. B

The table can be read row-wise. The first number when multiplied with the half of the third number, gives the second number, i.e.

$$17 * (12/2) = 17 * 6 = 102$$

Similarly for the second row,  $15 * (10/2) = 15 * 5 = 75$  - Option B

**SNAP Mock Test**  
Mocks designed exactly like the actual Exam

56. B

The table can be read row-wise. The first number when multiplied with third number, and then doubled, gives the second number, i.e.

$$12 * 14 * 2 = 336$$

Similarly for the second row,  $15 * 16 * 2 = 480$  - Option B

57. A

From statement III, we can infer that both B and C are in one boat, different from that of G.

Now, as per the question, if F and B are in the same boat, F and C are also together. So, when we use statement II, we can see that D has to be on the same boat as F. So, B, C, D and F are on one boat and the rest are in the other one (as only a maximum of 4 persons in a boat are allowed).

Option option A is correct with the final results we obtain.

58. D

From statement I, A and E are always together. If F joins them, the possibility of F and C being together is ruled out as in that case, D will have to be included and then, it will violate statement IV with 5 persons on a boat.

So, D will be on the other boat. Also, from statement III, we can infer that B and C are always together and not on the same boat as G. B and C cannot join A, E and F as it will once again, contradict statement IV. So, G joins A, E, F on a boat and the other 3- C, B and D are on the other boat.

Hence, option D.

59. C

For every subsequent figures, the number of horizontal and vertical lines decrease by 1.

In the first figure, we have 3 Horizontal and 4 vertical lines. In the next figure, we have 2 Horizontal and 3 vertical lines. In the next one, we have 1 horizontal and 2 vertical lines.

So, in the final figure, we will have 0 horizontal and 1 vertical line. Hence, Option C.

60. C

Figure 4 should be related to 3 in the same way as 2 is related to 1.

In figure 2, the dots remain at the same place and the lines flip by  $180^\circ$

Similarly, in figure 4, the dots should remain as it is and the lines should flip itself by  $180^\circ$

Option C shows the required figure.

**SNAP Syllabus PDF**  
PDF

61. A

Logic: Each letter of every term is a two-letter increment from the corresponding letters of the previous term.

$$K + 2 = M$$

$$Q + 2 = S$$

$$W + 2 = Y$$

$$C + 2 = E$$

62. **B**

For Mohan,

There are 2 cases for STD calls:

1) Call rate of 1.5 which will give  $30 \times 1.5 = \text{Rs. } 45$

2) Call rate of 2, which will give  $30 \times 2 = \text{Rs. } 60$

For Local calls,

30% of 100min in landline = 30 min of landline will cost  $30 \times 2 = \text{Rs. } 60$

40% of 100 min in GSM = 40 min of GSM will cost  $40 \times 1 = \text{Rs. } 40$

30% of 100 min in Airtel = 30 min of Airtel costs  $30 \times 1 = \text{Rs. } 30$

Total money spent by Mohan for local calls =  $\text{Rs. } 130$ .

In total he spends either  $\text{Rs. } 130 + 45 = 175$  or  $\text{Rs. } 130 + 60 = \text{Rs. } 190$ .

For Rohan,

The two cases for STD call rates will cost him:

1)  $18 \times 1.5 = \text{Rs. } 27$  with call rate of  $\text{Rs. } 1.5/\text{min}$

2)  $18 \times 2 = \text{Rs. } 36$  with call rate of  $\text{Rs. } 2/\text{min}$

For Local calls,

30% of 120 min = 36 min with GSM will cost him  $\text{Rs. } 36$ .

40% of 120 min = 48 min with landline will cost him  $48 \times 2 = \text{Rs. } 96$

30% of 120 min = 36 min with Airtel will cost him  $\text{Rs. } 36$ .

Total money spent on local calls =  $\text{Rs. } (36 + 96 + 36) = 168$ .

Including the STD calls, he spends either  $\text{Rs. } 195$  or  $\text{Rs. } 201$ .

Clearly, even the case where the maximum money spent by Mohan is less compared to the case where the minimum amount spent by Rohan is considered. Therefore, Rohan spends more of the two.

63. **A**

We will try to find the breakeven point at which the money spent at old rate was higher than or equal to the money spent on the new scheme.

Let us consider  $x$  SMS being sent a month.

Bill amount because of old rates =  $1.5x$

For the new scheme, money payable =  $0.6x + 35$ .

So, for the new scheme to be profitable,

$$1.5x > 0.6x + 35$$

$$\Rightarrow 0.9x > 35$$

$$\Rightarrow x > 35/0.9$$

$$\Rightarrow x > 38.88$$

or, from 39 messages/ month onwards, the scheme is profitable.

∴ For a person sending 38 SMS a month will not be benefited from the scheme.

64. **D**

To get a total bill of  $\text{Rs. } 199$ , we need to somehow amount the outgoing calls to  $\text{Rs. } 100$ , as the plan price is  $\text{Rs. } 99$

In Option A, 30 STD calls to Airtel (500 km+) will amount Rs.  $30 \times 1.5 =$  Rs. 45

55 Local calls to Airtel/ GSM will cost Rs.  $55 \times 1 =$  Rs. 55

So, total amount for the given option= Rs. 55+ Rs. 45= Rs. 100. This will amount to total bill of Rs. 199

In option B, 16 STD Airtel calls will amount to Rs.  $16 \times 1.5 =$  Rs. 24

76 local calls will cost Rs.  $76 \times 1 =$  Rs. 76

So, total amount for the given option= Rs. 76+ Rs. 24= Rs. 100. This will amount to total bill of Rs. 199

In option C, 10 STD calls (250 km) to Airtel, GSM and Landline will cost Rs.  $\{(10 \times 1.5) + (10 \times 2.5) + (10 \times 2.5)\} =$  Rs.  $(15 + 25 + 25) =$  Rs. 65

The bill from local calls can vary from Rs.  $30 \times 1$  to Rs.  $30 \times 2$  i.e from Rs. 30 to Rs. 60

So, total amount can vary from Rs. 95 to Rs. 125. So, a bill of Rs. 100 is possible, which can amount to a total bill of Rs. 199

In option D, 8 STD calls on Airtel, 4 GSM STD and 7 Landline STD, all 500 km+ will cost Rs.  $\{(8 \times 1.5) + (4 \times 3) + (7 \times 3.5)\} =$  Rs.  $(12 + 12 + 24.5)$

= Rs. 48.5

Local call bill will vary from Rs.  $55 \times 1$  to Rs.  $55 \times 2$ , which is from Rs. 55 to Rs. 110.

So, total amount can vary from Rs. 103.5 to Rs. 158.5. So, a bill of Rs. 100 is not possible. Therefore which a total bill of Rs. 199 is not possible in this case.

65. D

Since, the amount of the total ISD bill is not mentioned, we cannot determine the required entity.

So, Cannot be determined.

66. C

Total Demand=  $3000 + 600 + 2500 + 1200 + 3300 = 10600$

So, average demand=  $\frac{10600}{5} = 2120$ .

Total Production=  $1500 + 1800 + 1000 + 2700 + 2200 = 9200$

Average Production=  $\frac{9200}{5} = 1840$ .

Therefore difference in average production and average supply=  $2120 - 1840 = 280$ - Option C

67. A

Production of Company D= 2700

Production of company A= 1500

So, D's production is  $\frac{2700}{1500} = 1.8$  times that of A's production.

68. B

If we consider the entire circle, it represents both  $360^\circ$  as well as 100%.

So,  $360^\circ = 100\%$

$\Rightarrow 10\% = 36^\circ$

Paper's share is shown as 10%. therefore angle subtended by the paper's share is  $36^\circ$

69. D

It is given that 2% of C.P= Rs. 2000

$\Rightarrow \frac{2}{100} * CP = 2000$

$\Rightarrow CP = \frac{200000}{2}$ .

∴ CP = Rs. 1,00,000

Profit required = 5%

So, total SP = 1.05(1,00,000) = Rs. 1,05,000.

Copies sold = 12,500.

Therefore, SP of each copy = Rs.  $\frac{1,05,000}{12,500}$  = Rs.8.40- Option D

70.D

A fruit grows on tree. But according to the code words, tree is referred to as Sky. So, as per this question, a fruit grows on sky.

General English

71.D

Since we are showing an association here, the possessive form of "my", i.e., "**mine**", is the correct choice.

Hence, the answer is option D.

72.D

Since we are talking about a point in time here, "till" is the best choice for the answer.

Hence, the answer is option D.

73.C

"Since then" indicates that the action has already taken place.

Thus, "has changed" is the correct answer.

The answer is option C.

74.A

"Diarrhoea" is the correct spelling of the word in British English.

Hence, the answer is option A.

75.D

Option A: superintendent: This is the miss-spelt representation of the word Superintendent. Thus, this is not the correct option.

Option B: sleve: This is the miss-spelt representation of the word sleeve. Thus, this is not the correct option.

Option C: allotted: This is the miss-spelt representation of the word allotted. Thus, this is not the correct option.

Option D: Dissipate means to disappear. Since it has the correct spelling, thus this is the correct option.

The correct option is D.

76.B

The preposition "in" is used for a larger area, whereas "at" is used for a specific location.

Thus, the correct statement becomes "He lives in Bangalore at 115, Richmond Road."

Hence, the answer is option B.

77.B

"Aurally challenged" is a euphemism which means a polite or indirect way of referring to something that might sound harsh or unpleasant.

Hence, the answer is option B.

**78.B**

An "error" is a minor miscalculation or mistake that can happen to anyone, whereas a "fault" is a misguided habit or defect.

Error and mistake are related, as both refer to something incorrect.

Fault and defect are related, as a fault can indicate a flaw or imperfection, just like a defect.

Therefore, Option B is the correct answer: "If error is a mistake, then fault is a defect."

**79.D**

For the second blank, "as" is grammatically incorrect, whereas "literally" and "basically" make the statement too literal.

Option D is the best choice for the answer.

**80.A**

Since we are emphasizing on the words "The Outback", inverted commas should be used around them.

Hence, the answer is option A.

**81.C**

A comma should be used after the word "Rima" to show the separation of clauses.

Hence, the answer is option C.

**82.D**

'Veracious' means speaking or representing the truth.

Since the closest word similar to veracious is Truthful,

The correct option is D.

**83.C**

"Perturb" means to make someone anxious or disturbed.

Hence, the answer is option C.

**84.B**

"With a high hand" means "having or showing no regard for the rights, concerns, or feelings of others"

Hence, the answer is option B.

**85.D**

The phrase "I racked my brains" means I subjected my mind to hard thinking. It describes intense mental effort or strain to figure something out.

Option A: This implies research or study, not the mental struggle suggested by "racked my brains."

Option B: This involves seeking external help, while "racked my brains" focuses on personal effort.

Option C: This suggests a simpler, intuitive approach, not the intense thinking implied by the phrase.  
Therefore, Option D is the correct answer.

**86.C**

To have "cold feet" means to be too fearful to undertake or complete an action.

Hence, the answer is option C.

87. B

The most appropriate meaning of the idiomatic phrase "You will have to eat your words!" is:

**You will have to take back what you have said.**

This means that someone will need to retract or apologize for something they previously said, especially if it turns out to be wrong or inappropriate.

88. C

Sentence 1 implies that the speaker feels that the tickets should have been checked.

Sentence 2 implies that the speaker is wondering whether the tickets should have been checked.

Sentence 3 implies that the speaker is asking whether the tickets were checked.

Sentence 4 implies that the speaker feels that the tickets should have been checked.

Thus, 1 and 4 convey the same meaning.

Hence, the answer is option C.

89. A

Magnanimous refers to generous or forgiving, especially towards a rival or less powerful person.

Benevolence refers to the quality of being well-meaning; kindness.

Since 'mean' is the aptest opposite word in the context,

the correct option is A.

90. C

"Biannual" means twice in a year.

Hence the answer is option C.

91. D

'Temporal', 'ephemeral', and 'Transient' refers to something lasting only for a short time.

Since 'eternal' means lasting or existing forever,

The correct option is D.

92. C

'Intra' means on the inside, and 'Intravenous' means existing or taking place within, or administered into, a vein or veins.

Thus, the correct answer will be 'within'.

The correct option is C.

93. A

In sentence 5, "down" indicates the relation of the fire engine with the hill. Thus, it is used as a "preposition". Hence, 2-5 is a match.

Options C and D can be eliminated.

In sentence 8, "down" is used to describe a noun [train]. Thus, it is used as an adjective. Hence, 1-8 is a match.

Hence, option A is the answer.

In sentence 6, "ups" and "downs" are nouns. Hence, 3-6 is a match.

In sentence 7, "down" denotes action and is thus, used as a verb. Hence, 4-7 is a match.

94. B

The correct idioms are:

1. "As deaf as a post"
2. "As bitter as gall"
3. "As unpredictable as the weather"
4. "As slippery as an eel"

Hence, the answer is option B.

#### 95. A

In sentence 8, "above" is used to describe a noun [information]. Thus, it is used as an adjective. Hence, options B and D are rejected.

In sentence 7, "above" is used to describe a verb [look]. Thus, it is used as an adverb. Hence, option C is rejected.

The answer is option A.

#### 96. B

Since "and" is used to join "idli" and "sambar", they form a singular entity. Thus, the verb used should have been "makes".

Hence, the answer is option B.

#### 97. D

The given sentence does not have any errors.

Hence, the answer is option D.

#### 98. D

- A. "Whose" should have been used instead of "Who's".
- B. "Who's" should have been used instead of "Whose".
- C. "Whom" should have been used instead of "who".
- D. It is grammatically correct.

Hence, the answer is option D.

#### 99. B

The first sentence has two possessives [his] which are incorrect.

Only option B is the correct sentence.

Hence, the answer is option B.

#### 100. D

1. The position of the phrase "in the newspaper" makes it seem as if the wedding is taking place inside a newspaper. Hence, it is incorrect.

2. The phrase "that took place" should have been followed by a destination or time. Hence, it is incorrect.

Hence, the answer is option D.

#### 101. D

Since the sentence is in the present tense, options B and C can be eliminated.

Since "unless" is used, the second part will be a positive sentence. Thus, option A can be eliminated.

Hence, the answer is option D.

**102. B**

5 starts the discussion by introducing the topic.

4 follows 5 as it gives the reason why English is called the language of opportunities.

1 will follow 4 as it tells where the language can take us in terms of opportunities.

3 will follow 1 as it mentions what the opportunities are for.

Finally, 2 concludes by telling that there is a great demand for English.

Thus, the required sequence is 5-4-1-3-2

Hence, the answer is option B.

**103. D**

"wouldn't have got typhoid" means that the sentence is in the past perfect tense.

Option D is the only grammatically correct sentence of the given tense.

Hence, the answer is option D.

**104. B**

The context of the line indicates the possibility of a mistake.

Among the options, "likely" is the most appropriate choice.

Hence, the answer is option B.

**105. A**

Since the sentence is negative, the question tag will be positive. Options B and D are thus, eliminated.

The auxiliary verb used here is "is". Thus, the question tag will be "does he?".

Hence, the answer is option A.

**106. B**

The use of "as ... as" always denotes a simile.

Hence, the answer is option B.

**107. A**

"Death" is given a human ability to lay a hand on someone. This signifies personification.

Hence, the answer is option A.

**108. A**

The "Frozen Feelings" in the passage refer to a) negative childhood experiences. The text explains how intense emotions like shock, violence, fear, or pain from early childhood are deeply imprinted into memory, causing a subconscious re-experience of trauma when similar situations arise later in life. This "freezing" of feelings ties directly to negative experiences, not merely learning patterns or adult learning inability, making a) the best answer. Options b) and c) are related but too broad or inaccurate, and d) is incorrect as a) fits the context.

**109. C**

A "glitch" refers to a sudden "malfunction".

The author says that whenever we are faced with a negative situation similar to what we have experienced in our childhood, it causes a glitch and we experience all the emotions and the memories of our childhood associated with it.

Hence, the answer is option C.

**110. C**

In the last paragraph, the author says that the process of change need not be traumatic. This negates option A.

Option B says that we behave childishly all the time, whereas the author associates this behaviour with a "glitch". Hence, option B is also negated.

Hence, the answer is option C.

General Awareness
