Quantitative Aptitude

1. Average of five numbers is 61. If the average of first and third number is 69 and the average of second and fourth number is 69, what is the fifth number ?

- A 31
- B 29
- C 25
- D 35

2. Kajal spends 55% of her monthly income on grocery, clothes and education in the ratio of 4 : 2 : 5 respectively. If the amount spent on clothes is Rs.5540/-, what is Kajal's monthly income?

- A Rs.55,400
- B Rs.54,500
- C Rs.55,450
- D Rs.55,650

A video player interface. At the top left, there is a text box containing a math problem: "Kajal spends 55% of her monthly income on grocery, clothes and education in the ratio of 4 : 2 : 5 respectively. If the amount spent on clothes is Rs.5540/-, what is Kajal's monthly income? 100X". At the top right is the 'cracku' logo. Below the text box is a large play button icon. At the bottom right, a smaller video frame shows a person in a black shirt sitting at a desk. The entire video player is set against a light gray background with a large, faint watermark of the word 'cracku' repeated diagonally.

▶ VIDEO SOLUTION

3. The simple interest accrued on a sum of certain principal in 8 years at the rate of 13% per year is Rs.6500. What would be the compound interest accrued on that principal at the rate of 8% per year in 2 years?

- A Rs.1040
- B Rs.1020
- C Rs.1060
- D Rs.1200

The simple interest accrued on a sum of certain principal in 8 years at the rate of 13% per year is Rs.6500. What would be the compound interest accrued on that principal at the rate of 8% per year in 2 years?

A) Rs.1040
B) Rs.1020
C) Rs.1060
D) Rs.1200

$$SI = \frac{P \times R \times T}{100}$$

$$6500 = \frac{P \times 13 \times 8}{100}$$

$$P = \frac{6500 \times 100}{13 \times 8} = 6250$$

$$A = 6250(1 + 0.08)^2$$

$$= 6250(1 + 2 \times 0.08 + 0.0064)$$

$$= 6250(1 + 0.16 + 0.0064)$$

$$= 6250(1.1664)$$

$$= 7228$$

▶ VIDEO SOLUTION

4. 8 men and 4 women together can complete a piece of work in 6 days. The work done by a man in one day is double the work done by a woman in one day. If 8 men and 4 women started working and after 2 days 4 men left and 4 new women joined, in how many more days will the work be completed?

- A 5 days
- B 8 days
- C 6 days
- D 4 days

8 men and 4 women together can complete a piece of work in 6 days. The work done by a man in one day is double the work done by a woman in one day. If 8 men and 4 women started working and after 2 days 4 men left and 4 new women joined, in how many more days will the work be completed?

A) 5 days
B) 8 days
C) 6 days
D) 4 days

$$\text{Man } \rightarrow 2 \text{ units}$$

$$\text{Woman } \rightarrow 1 \text{ unit}$$

$$8 \text{ men } \rightarrow 16 \text{ units}$$

$$4 \text{ women } \rightarrow 4 \text{ units}$$

$$16 + 4 = 20 \text{ units}$$

$$20 \text{ units} \rightarrow 6 \text{ days}$$

$$16 \text{ units} \rightarrow ?$$

$$16 \text{ units} \rightarrow 4 \text{ days}$$

$$20 \text{ units} \rightarrow 5 \text{ days}$$

Total work = $6 \times 20 = 120 \text{ units}$

5. The cost of fencing a circular plot at the rate of Rs.15 per m is ` 3300. What will be the cost of flooring the plot at the rate of Rs.100 per sq m?

- A Rs.385000
- B Rs.220000
- C Rs.350000

- D Cannot be determined
6. In an examination, Raman scored 25 marks less than Rohit. Rohit scored 45 more marks than Sonia. Rohan scored 75 marks which is 10 more than Sonia. Ravi's score is 50 less than, maximum marks of the test. What approximate percentage of marks did Ravi score in the examination, if he gets 34 marks more than Raman ?
- A 90
 - B 70
 - C 80
 - D 60
7. An aeroplane flies with an average speed of 756 km/h. A helicopter takes 48 h to cover twice the distance covered by aeroplane in 9 h. How much distance will the helicopter cover in 18 h? (Assuming that flights are non-stop and moving with uniform speed.)
- A 5010km
 - B 4875km
 - C 5760km
 - D 5103km

8. Average weight of 19 men is 74 kgs, and the average weight of 38 women is 63 kgs. What is the average weight (rounded off to the nearest integer) of all the men and the women together?
- A 59kg
 - B 65kg
 - C 69kg
 - D 67kg

Average weight of 19 men is 74 kgs, and the average weight of 38 women is 63 kgs. What is the average weight (rounded off to the nearest integer) of all the men and the women together?

$19+38=57$

$19 \times 74 + 38 \times 63$

A) 59kg
B) 61kg
C) 69kg
D) 67kg

▶ VIDEO SOLUTION

9. Mr Giridhar spends 50% of his monthly income on household items and out of the remaining he spends 50% on transport, 25% on entertainment, 10% on sports and the remaining amount of Rs. 900 is saved. What is Mr Giridhar's monthly income?

- A Rs.6000
- B Rs.12000
- C Rs.9000
- D Cannot be determined

10. A and B together can complete a task in 20 days. B and C together can complete the same task in 30 days. A and C together can complete the same task in 40 days. What is the respective ratio of the number of days taken by A when completing the same task alone to the number of days taken by C when completing the same task alone ?

- A 2 : 5
- B 2 : 7
- C 3 : 7
- D 1 : 5

A and B together can complete a task in 20 days. B and C together can complete the same task in 30 days. A and C together can complete the same task in 40 days. What is the respective ratio of the number of days taken by A when completing the same task alone to the number of days taken by C when completing the same task alone ?

cracku

Total work = LCM(20, 30, 40) = 120 units.

$\frac{1}{A+B} = \frac{1}{20}$ $\Rightarrow A+B = 20$
 $\frac{1}{B+C} = \frac{1}{30}$ $\Rightarrow B+C = 30$
 $\frac{1}{A+C} = \frac{1}{40}$ $\Rightarrow A+C = 40$

$\frac{1}{A} + \frac{1}{B} = \frac{1}{20}$
 $\frac{1}{B} + \frac{1}{C} = \frac{1}{30}$
 $\frac{1}{A} + \frac{1}{C} = \frac{1}{40}$

$\frac{1}{A} = \frac{1}{20} - \frac{1}{30} = \frac{1}{60}$
 $\frac{1}{C} = \frac{1}{40} - \frac{1}{30} = \frac{1}{120}$

$A = 60$
 $C = 120$

A : C = 6 : 120 = 1 : 20

11. A certain amount was to be distributed among A, B and C in the ratio 2 :3 :4 respectively, but was erroneously distributed in the ratio 7:2:5 respectively. As a result of this, B got Rs.40 less. What is the amount ?

- A Rs.210
- B Rs.270
- C Rs.230
- D Rs.280

A certain amount was to be distributed among A, B and C in the ratio 2:3:4 respectively, but was erroneously distributed in the ratio 7:2:5 respectively. As a result of this, B got Rs.40 less. What is the amount?

$\frac{2}{7} \times 126k = 28k$

$\frac{2}{9} \times 126k = 42k$

▶ VIDEO SOLUTION

12. Last year there were 610 boys in a school. The number decreased by 20 percent this year. How many girls are there in the school if the number of girls is 175 percent of the total number of boys in the school this year?

- A 854
- B 848
- C 798
- D 782

13. Rs.73,689/- are divided between A and B in the ratio 4 :7. What is the difference between thrice the share of A and twice the share of B?

- A Rs.36,699
- B Rs.46893
- C Rs.20,097
- D Rs.13,398

SNAP Syllabus PDF

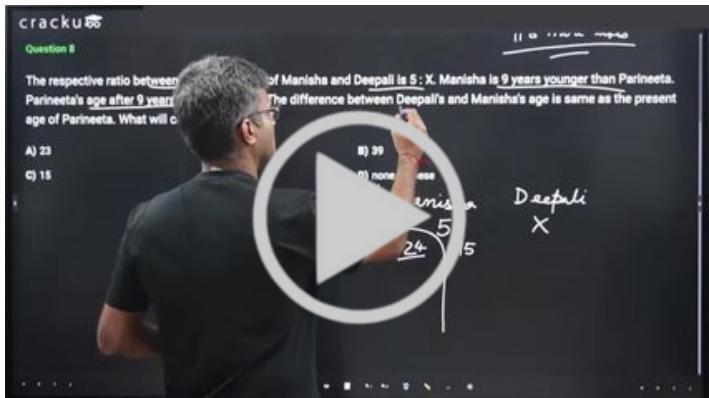

14. The average marks in English subject of a class of 24 students is 56. If the marks of three students were misread as 44, 45 and 61 of the actual marks 48, 59 and 67 respectively, then what would be the correct average?

- A 56.5
- B 59
- C 57.5
- D None of these

15. The respective ratio between the present age of Manisha and Deepali is 5 : X. Manisha is 9 years younger than Parineeta. Parineeta's age after 9 years will be 33 years. The difference between Deepali's and Manisha's age is same as the present age of Parineeta. What will come in place of X?

- A 23
- B 39
- C 15
- D none of these

VIDEO SOLUTION

16. Anand travelled 300 km by train and 200 km by taxi. It took him 5 h and 30 min. However, if he travels 260 km by train and 240 km by taxi, he takes 6 min more. The speed of the train is

- A 100km/h
- B 120km/h
- C 80km/h
- D 110km/h

17. A certain number of people were supposed to complete a work in 24 days. The work, however, took 32 days, since 9 people were absent throughout. How many people were supposed to be working originally?

- A 32
- B 27
- C 36
- D 30

18. Profit earned by an organization is distributed among officers and clerks where the individual amount received by them is in the ratio of 5 : 3. If the number of officers is 45 and the number of clerks is 80 and the amount received by each officer is Rs.25,000, what was the total amount of profit earned?

- A Rs.22 lakh
- B Rs.18.25lakh

- C Rs.18 lakh
D Rs.23.25lakh
19. A shopkeeper labelled the price of his articles so as to earn a profit of 30% on the cost price. He then sold the articles by offering a discount of 10% on the labelled price. What is the actual per cent profit earned in the deal?
- A 18%
B 15%
C 20%
D none of these

28. I have to reach a certain place at a certain time and I find that I shall be 15 min too late, if I walk at 4 km an hour, and 10 min too soon, if I walk at 6 km an hour. How far have I to walk?

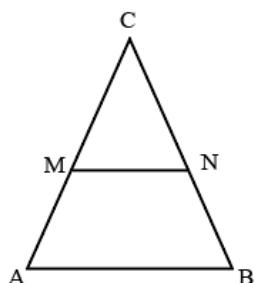

- A 25 km
- B 5 km
- C 10 km
- D none of these

SNAP Syllabus PDF

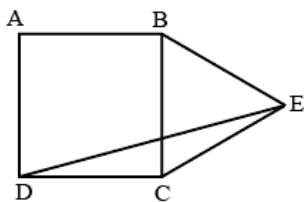

29. In the triangle ABC, MN is parallel to AB. Area of trapezium ABNM is twice the area of triangle CMN. What is ratio of CM : AM ?

- A $\frac{1}{(\sqrt{3}+1)}$

- B $\frac{(\sqrt{3}-1)}{2}$
- C $\frac{(\sqrt{3}+1)}{2}$
- D none of these

30. If ABCD is a square and BCE is an equilateral triangle, what is the measure of the angle DEC?

- A 15°
- B 30°
- C 20°
- D 45°

31. what is the value of $\frac{\log_{27} 9 \times \log_{16} 64}{\log_4 \sqrt{2}}$?

- A $\frac{1}{6}$
- B $\frac{1}{4}$
- C 8
- D 4

32. At a college football game, $\frac{4}{5}$ of the seats in the lower deck of the stadium were sold. If $\frac{1}{4}$ of all the seating in the stadium is located in the lower deck, and if $\frac{2}{3}$ of all the seats in the stadium were sold, then what fraction of the unsold seats in the stadium was in the lower deck?

- A $\frac{3}{20}$
- B $\frac{1}{6}$
- C $\frac{1}{5}$
- D $\frac{1}{3}$

33. A train starts from Delhi at 6 : 00 AM and reaches Ambala Cantt at 10 AM. The other train starts from Ambala Cantt at 8 AM and reaches Delhi at 11:30 AM. If the distance between Delhi and Ambala Cantt. is 200 km, then at what time did the two trains meet each other ?

- A 8 : 56 AM

- B 8 : 46 AM
- C 7 : 56 AM
- D 8 : 30 AM

34. A ship, 40 km from the shore, springs a leak which admits $3\frac{3}{4}$ tonnes of water in 15 min. 60 tonnes would suffice to sink her, but the ship's pumps can throw out 12 tonnes of water in one hour. Find the average rate of sailing, so that it may reach the shore just as it begins to sink.

- A $1\frac{1}{2}$ km/h
- B $2\frac{1}{2}$ km/h
- C $3\frac{1}{2}$ km/h
- D 2 km/h

35. Three persons start walking together and their steps measure 40 cm, 42 cm and 45 cm respectively. What is the minimum distance each should walk so that each can cover the same distance in complete steps?

- A 25 m 20 cm
- B 50 m 40 cm
- C 75 m 60 cm
- D 100 m 80 cm

36. Let x denote the greatest 4-digit number which when divided by 6, 7, 8, 9 and 10 leaves a remainder of 4, 5, 6, 7 and 8 respectively. Then, the sum of the four-digits of x is

- A 25
- B 18
- C 20
- D 22

37. What is the maximum sum of the terms in the arithmetic progression $25, 24\frac{1}{2}, 24, \dots$?

- A $637\frac{1}{2}$
- B 625
- C $662\frac{1}{2}$
- D 650

cracku

What is the maximum sum of the terms in the arithmetic progression 25, 24.5, 24,?

A) 637
B) 625
C) 662
D) 650

The notes show the derivation of the formula for the sum of an arithmetic series. It starts with the formula for the n-th term of an AP: $a_n = a + (n-1)d$. Then, it shows the sum of the first n terms: $S_n = \frac{n}{2} [2a + (n-1)d]$. This is then simplified to $S_n = \frac{n}{2} [a + a + (n-1)d]$, which is further simplified to $S_n = \frac{n}{2} [a + a_n]$.

Instructions [52 - 53]

In each of these questions two statements are given followed by two conclusions numbered I and II. Consider the two given statements to be. True even if they seem to be absurd. Mark answer as

52. Statements: All bulbs are birds. Some birds are butterflies.

Conclusions:

- I. All butterflies are bulbs.
- II. Some bulbs are butterflies.

- A if only conclusion II follows
- B if only conclusion I follows
- C if either conclusion I or II follows
- D if neither conclusion I nor II follows

53. Statements: No coin is a dollar. Red token is a coin.

Conclusions:

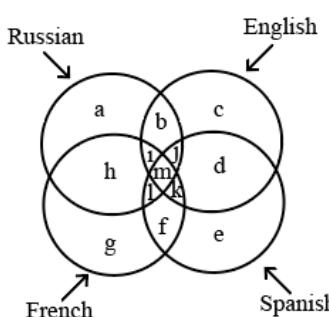

- I. Red token is not a dollar.
- II. Red token may not be a dollar

- A if only conclusion II follows
- B if only conclusion I follows
- C if either conclusion I or II follows
- D if neither conclusion I nor II follows

Instructions [54 - 58]

Staff employed in a UNESCO office in Paris are represented by four intersecting circles as in the given diagram. Each circle represents people who can read and write English, French, Spanish and Russian. Strength of people in each circle is also shown alongside. Study the diagram to answer the questions that follow.

$$a = 40 \quad c = 2a \quad e = \frac{1}{2}a \quad g = 2E$$

54. How many people know only Spanish ?

- A 10
- B 20
- C 40

D 60

55. How many people can read and write any one language except French ?

A 100

B 160

C 140

D 120

56. People who can read and write all the language except Spanish, are represented by

A k

B g

C b

D i

- A Nephew
- B son
- C cousin

D uncle

Instructions [65 - 66]

In a school the periodical examinations are held every month. In a session during April 'X'- March 'X + 1', Rakesh a student of class IV, section B appeared for each of the periodical exams. The maximum total marks in each periodical exam is 50. The aggregate marks obtained by him in each periodical exam are given below.

Months	Year X										Year X + 1	
	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Jan.	Feb.	March
Marks	35	37	38	38	41	43	45	45	46	47	48	49

65. The total marks obtained in December X is what per cent more than the total marks obtained in June X ?

- A 12.8%
- B 20.05%
- C 24.05%
- D 21.05%

66. (In which periodical exams did Rakesh obtain the highest percentage increase in marks over the previous periodical exams?

- A May
- B October
- C December
- D September

Instructions [67 - 69]

India is a multi-religion, multi-language and multi-cultural country where people belonging to different religions join in celebrating the festivities together. The Indian Government declares such big occasions as public holidays to enable the citizens to enjoy and foster the feelings of brotherhood. Five broad-minded persons belonging to different religions were asked to give their preferences of four such festivals which they would like to enjoy with likeminded brethren. Their options are

- A. Holi, Dussehra, Diwali, Guru Nanak Birthday
- B. Shivratri, Christmas, Onam, Eid
- C. Holi, Shivratri, Christmas, Diwali
- D. Holi, Dussehra, Guru Nanak Birthday, Eid
- E. Christmas, Diwali, Onam, Guru Nanak Birthday

67. Which pair celebrates Christmas and Onam but not Dussehra and Holi?

- A A and C
- B A and E
- C B and D
- D B and E

68. Which pair does not participate in Eid and Onam but joins in Holi?

- A A and B
- B A and C
- C C and D
- D D and E

Instructions [71 - 73]

Read the following Passage carefully and answer the questions below:

A TED talk (the acronym stands for Technology, Entertainment, and Design) is one of the routes to academic stardom that didn't exist a decade ago. (The 30th anniversary celebration aside, curators only began posting fame-making free online videos in 2006.) Although TED plays an inordinate role in setting the tone for how ideas are conveyed—not only because of the reach of its videos but also through spinoffs like regional "TEDx" events and the TED Radio Hour, one of the few places nonpolicy intellectuals get substantial on-air time—it's just one of a number of platforms that are changing the ecology of academic celebrity. These include similar ideas-in-nuggets conclaves, such as the Aspen Ideas Festival and PopTech, along with huge online courses and—yes, still—blogs. These new, or at least newish, forms are upending traditional hierarchies of academic visibility and helping to change which ideas gain purchase in the public discourse.

In a famous essay, "The Unbearable Ugliness of Volvos," first published in the early 90s, the literary scholar Stanley Fish wrote that "the flourishing of the lecture circuit has brought with it new sources of extra income ... [and] an ever-growing list of stages on which to showcase one's talents, and geometric increase in the

availability of the commodities for which academics yearn, attention, applause, fame, and ultimately, adulation of a kind usually reserved for the icons of popular culture.” Fish was Exhibit A among professors taking advantage of such trends, and his trailblazing as a lit-crit celebrity inspired the dapper, globe-trotting littheory operator Morris Zapp, a character in David Lodge’s academic satire Small World. But the world Fish was describing, where no one could live-tweet the lectures, let alone post the talks for worldwide distribution, now seems sepia-toned. “If David Lodge’s Morris Zapp were alive and kicking today,” observes John Holbo, an associate professor of philosophy at the National University of Singapore, and blogger at Crooked Timber and the Valve, “he’d be giving a TED talk, not an MLA talk. Which is to say: He wouldn’t be doing Theory. He probably wouldn’t be in an English department.”

71. The passage is mainly about:

- A Technology, Entertainment, and Design
- B Turning over the conventional.
- C Gaining popular adulation.
- D Changing presentations

72. The phrase “sepia-toned” implies:

- A The end of an era.
- B The way things were.
- C The brown pigment
- D The time bound nature of things.

73. Which of the following cannot be inferred from the passage?

- A TED is the future
- B Theory can no longer be counted on
- C Philosophy is best understood through demos
- D TED is irreplaceable.

Instructions [74 - 77]

Read the following Passage carefully and answer the questions below:

A spectre is haunting the world, just as Karl Marx and Friedrich Engels wrote in the Communist Manifesto of 1848. This time, however, it is not the spectre of communism but that of neoliberalism. Just as Marx and Engels reported of ‘a holy alliance to exorcise this spectre,’ there is once again an alliance, whether holy or unholy, that has formed to chase the ghost of neoliberalism from the world stage. In any case, it is a curious alliance that has committed to fighting neoliberalism: Religious leaders and artists, environmental activists and globalisation critics, politicians of the left and the right as well as trade unionists, commentators and academics. They all share a passion to unmask neoliberalism as an inhuman, anti-social, and potentially misanthropic ideology or as a cynical exercise by strangely anonymous forces that wish to exploit the world to their own advantage.

The members of this colourful alliance against neoliberalism are as united in their opposition to neoliberalism as they are diverse. This suggests that neoliberalism cannot be too clearly defined as a concept. Rather, it is a broad umbrella under which very different groups with various points of view can meet. In the church of anti-neoliberalism, there is a place for anyone who believes that neoliberalism stands in the way of reaching his or her political goals. This may also explain the lack of any clear and coherent definition of neoliberalism among its dissenters.

Yet the most curious characteristic of neoliberalism is the fact that these days hardly anyone self-identifies as a neoliberal. In former times, ideological debates were fought between, say, conservatives and socialists, collectivists and individualists. While there may not have been any other agreement between these opposing groups, at least they would have agreed about their respective identities. A socialist would not have felt offended by a conservative calling him a socialist and vice-versa. In present-day debates around neoliberalism, on the other hand, most accused of holding 'neoliberal' views would not accept being called 'neoliberal.' Either they would insist on being something else (whether it is 'liberal,' 'classical liberal,' or 'libertarian'), or they would simply claim to be misunderstood by their opponents. In any case, scarcely anybody wants to be a 'neoliberal' any more. For example, in an online survey of the readers of Andrew Norton's blog, out of more than 1,200 participants not a single person self-identified with the term, while 'classical liberal,' 'conservative,' and 'libertarian' were strong responses. These are strange debates indeed when the enemy you are fighting claims he does not exist.

74. According to the passage, the spectre, is being chased by all except which one of the following:

- A Religious leaders and artists
- B Environmental activists and globalisation critics.
- C Communists and socialists.
- D Politicians and trade unionists

75. Why, according to the passage, is there an association against the phenomenon of neoliberalism?

- A Because they cannot face it alone
- B Because it is easy to collaborate against it.
- C Because they resent its spread.
- D Because they fear the misuse of the world.

76. The author implies:

- A That neoliberalism defies conceptualization
- B That neoliberalism is vague
- C That neoliberalism has not been accepted
- D That neoliberalism has not been understood by people

77. The word 'libertarian' used in the passage can be best substituted with

- A neoliberal

- B libertine- immoral
- C conservative
- D liberal- favouring individual liberty

Quantitative Aptitude

1. B

Let the five numbers be a, b, c, d, e in the given order.

$$a+b+c+d+e = 61*5=305 \quad \text{---- Eq 1}$$

$$a+c = 69*2 = 138$$

$$b+d = 69*2 = 138$$

$$\text{From eq 1: } e = 305 - (138 + 138) = 305 - 276 = 29$$

B is the correct answer.

2. A

Let the monthly income of Kajal be 100k

It is given that she spent 55% of the monthly income on grocery, clothes and education in the ratio of 4 : 2 : 5 respectively

i.e she spent 55k on grocery, clothes and education in the ratio of 4 : 2 : 5 respectively.

$$\text{Amount spent on clothes} = \frac{2}{11} \times 55k$$

$$10k = 5540 \text{ (given)}$$

$$\text{So } 100k = 55400$$

$$\text{Monthly income} = 100k = 55400$$

A is the correct answer.

 [VIDEO SOLUTION](#)

3. A

Simple Interest = $\frac{P \cdot T \cdot r}{100}$ where P is the principal, T is the time period and r is the rate of interest.

The simple interest accrued on a sum of certain principal in 8 years at the rate of 13% per year is Rs.6500

$$6500 = \frac{P \times 8 \times 13}{100}$$

$$P = \text{Rs. } 6250$$

$$\text{Compound Interest on } 6250 \text{ for 2 years at 8\% rate of interest} = 6250 \left(1 + \frac{8}{100}\right)^2 - 6250$$

$$= \text{Rs. } 1040$$

A is the correct answer.

 [VIDEO SOLUTION](#)

4. A

Let the work done by a woman in one day = x units

The work done by a man in one day = 2x units

8 men and 4 women together can complete a piece of work in 6 days.

$$\text{Total work} = (8*2x+4*x)6 = 120x \text{ units}$$

$$\text{Amount of work done by 8 men and 4 women in 2 days} = (8*2x+4*x)2 = 40x \text{ units}$$

The remaining $80x$ units will be done by 8 women and 4 men

$$\text{Number of days taken by 8 women to complete } 80x \text{ units of work} = \frac{80x}{16x}$$

=5 days

A is the correct answer.

 VIDEO SOLUTION

5.A

Let r be the radius of the circular plot

$$\text{Perimeter of the plot} = 2\pi r$$

$$\text{Cost of fencing the circular plot at Rs 15 per meter} = 2\pi r * 15$$

$$2\pi r * 15 = 3300$$

$$r = 35\text{m}$$

Cost of flooring per sq m = Rs 100

$$\text{Area of the circular plot} = \pi r^2$$

$$= 3850 \text{ sq m}$$

$$\text{Cost of flooring the circular plot} = 3850 * 100 = \text{Rs.} 385000$$

A is the correct answer.

6.B

Marks obtained by Rohan = 75

Marks obtained by Sonia = 65

Marks obtained by Rohit = 65+45=110

Marks obtained by Raman = 110-25 = 85

Marks obtained by Ravi = 85+34 = 119

Maximum Marks = 119+50 = 169

$$\text{Required percentage} = \frac{119}{169} \times 100$$

$$= 70\%$$

B is the correct answer.

7.D

Speed of the aeroplane = 756 km/h.

It is given that twice the distance covered by the aeroplane in 9 hrs is equal to the distance covered by the helicopter in 48 hrs.

Distance covered by the aeroplane in 9 hrs = $756 * 9 = 6804$ km.

$$\text{Speed of the helicopter} = \frac{2 \times 6804}{48} = 283.5$$

Distance covered by the helicopter in 18 hrs = $283.5 * 18 = 5103$ km.

D is the correct answer.

8.D

The average weight of 19 men is 74 kgs

The average weight of 38 women is 63 kgs

$$\text{The average weight of all the men and women together} = \frac{74 \times 19 + 63 \times 38}{19 + 38}$$

$$= \frac{3800}{57}$$

= 66.66 kg

≈ approx 67 kg

D is the correct answer.

 VIDEO SOLUTION

9. B

Let the total monthly income of Mr Giridhar be 100g

The proportion of income he spends on household items = 50% i.e 50g

Of the remaining 50%, the proportion of income he spends on transport, entertainment and sports are 50%, 25%, 10%

15% of 50g = Amount saved

7.5g = 900(given)

100g = 12000

The monthly income of Mr Giridhar = Rs.12000

10. D

Let a, b, c be the amount of work done by A, B, C in 1 day and the total work be W units

$$(a+b) 20 = (b+c) 30 = (a+c) 40 = W$$

$$(a+b) 2 = (b+c) 3 = (a+c) 4$$

$$2a+2b = 3b+3c$$

$$b = 2a-3c$$

$$2a+2b = 4a+4c$$

$$2b = 2a+4c$$

$$2(2a-3c) = 2a+4c$$

$$2a = 10c$$

$$a = 5c$$

$$\text{Number of days taken by A to complete the work} = \frac{W}{a}$$

$$\text{Number of days taken by C to complete the work} = \frac{W}{c}$$

$$\text{Required ratio} = \frac{\frac{W}{a}}{\frac{W}{c}}$$

$$= 1:5$$

D is the correct answer.

 VIDEO SOLUTION

SNAP Syllabus PDF

11. A

Let the amount be. Rs x

$$\text{B's share in the ratio } 2:3:4 = \frac{3}{9} \text{ of } x = \frac{x}{3}$$

$$\text{B's share in the ratio } 7:2:5 = \frac{2}{14} \text{ of } x = \frac{x}{7}, \text{ therefore}$$

$$\frac{x}{3} - \frac{x}{7} = 40$$

$$\frac{4x}{21} = 40$$

$$x = (40 \times 21) / 4 = \text{Rs } 210$$

A is the correct answer.

 VIDEO SOLUTION

12. A

Number of boys in the school last year = 610

Number of boys in the school in the present year = 610×0.8 (It is given that the boys decreased by 20% this year)

$$= 488$$

Number of girls in the class = $1.75 \times$ Number of boys

$$= 1.75 \times 488$$

$$= 854$$

A is the correct answer.

13. D

Rs.73,689/- are divided between A and B in the ratio 4 :7.

$$\text{Share of A} = \frac{4}{11} \times 73689/- = 26796$$

$$\text{Share of B} = \frac{7}{11} \times 73689/- = 46893$$

Now, we have to find the difference between thrice the share of A and twice the share of B

$$= 3 \times 26796 - 2 \times 46893 = \text{Rs. } 13398$$

14. D

Given,

Sum of the marks misread = $44+45+61 = 150$

Actual marks of the students = 48, 59 and 67

Actual marks sum = $48+59+67 = 174$

Difference = $174-150 = 24$

$$\text{Correct average} = 56 + \frac{24}{24}$$

$$= 57$$

D is the correct answer.

15. D

Let the present age of Manisha be $5a$

The present age of Deepali = Xa

The present age of Praneeta = $5a+9$

Praneeta's age after 9 years = $5a+18=33$

$$5a=15$$

$$a=3$$

The difference between Deepali's and Manisha's age is the same as the present age of Parineeta

$$Xa-5a=5a+9$$

$$3X-15=15+9$$

$$3X=39 \Rightarrow X=13$$

D is the correct answer.

▶ VIDEO SOLUTION

16.A

1st case :

Distance travelled by train = 300km and by taxi = 200km

Let the speed of train be x km/hr and that of taxi be y km/hr.

Time taken by train = $300/x$ and time taken by taxi = $200/y$ hr

$$\frac{300}{x} = \frac{200}{y}$$

Total time taken = 5hrs 30 mins = $5\frac{1}{2}$ hrs

$$\frac{300}{x} + \frac{200}{y} = 5\frac{1}{2}$$

On solving we get : $600y + 400x = 11xy$ ---- Eq (1)

2nd case :

Distance travelled by train = 260 km and by taxi = 240 km

The speed of train and taxi will remain the same.

Time taken by train = $\frac{260}{x}$ hr and by taxi = $\frac{240}{y}$ hr

$$\frac{260}{x} + \frac{240}{y} = 5\text{hrs } 36\text{ mins}$$

$$\frac{260}{x} + \frac{240}{y} = 5\frac{3}{5} \text{ on solving we get,}$$

$$1300y + 1200x = 28xy \text{ --- Eq (2)}$$

Solving 1 and 2 we get:

$$x=100 \text{ km/hr}$$

Speed of the train = 100km/hr

A is the correct answer.

17.C

Let the total work be W units and the number of people employed to do it were ' x '

$$24*x = 32*(x-9)$$

$$3x = 4(x-9)$$

$$x=36$$

\therefore Number of people who were supposed to work originally = 36

C is the correct answer.

18.D

Profit received by each officer= Rs.25000

Therefore, Profit received by each clerk= $\frac{3}{5} \times 25000 = \text{Rs.15000}$

Therefore, Total earned profit

$$= \text{Rs. } (45 \times 25000 + 80 \times 15000)$$

$$= \text{Rs.}(1125000 + 1200000)$$

$$= \text{Rs.}23.25 \text{ lakh}$$

D is the correct answer.

19.D

Let the cost price of the article be Rs.100x.

Marked price = Rs.130x

$$\text{S.P. of the article} = \frac{130x \times 90}{100} = \text{Rs.}117x$$

$$\text{Actual percent profit} = \frac{117-100}{100} \times 100$$

=17%

D is the correct answer.

VIDEO SOLUTION

20.D

The five boys can be arranged on a round table in $(5-1)!$ ways i.e 24

Now there will be five spaces created between two boys.

So three girls can be seated in 5C_3 ways*3! = $10*6=60$

Total number of ways in which five boys and three girls can be seated = $24*60 = 1440$

D is the correct answer.

SNAP Online Coaching

21.C

Let the filling capacity of the pump be $x m^3/\text{min}$

Then the emptying capacity of the pump = $(x+10) m^3/\text{min}$

The time required for filling the tank = $\frac{2400}{x}$

The time required for emptying the tank = $\frac{2400}{x+10}$

The pump needs 8 min less to empty the tank than to fill it.

$$\frac{2400}{x} - \frac{2400}{x+10} = 8$$

$$\frac{300}{x} - \frac{300}{x+10} = 1$$

$$300(x+10) - 300(x) = x(x+10)$$

$$x^2 + 10x - 3000 = 0$$

$$(x+60)(x-50) = 0$$

$$x = 50 \text{ or } -60$$

Since x cannot be negative, $x = 50$

Filling capacity of the pump = $50 m^3/\text{min}$

C is the correct answer.

22.B

Let the usual speed of the plane be $v \text{ kmph}$ and the time taken by the plane to cover 1500m = $t \text{ hrs}$

To reach the destination on time, the increased speed of the plane = $v+250 \text{ kmph}$

Since he started 30 min later, the time taken should be $t - \frac{1}{2} \text{ hr}$

$$v*t = (v+250)(t - \frac{1}{2})$$

$$v = (250t - 125)2$$

$$\frac{1500}{v+250} = t - \frac{1}{2}$$

$$\frac{1500}{500t - 250 + 250} = t - \frac{1}{2}$$

$$\frac{3}{t} = t - \frac{1}{2}$$

On solving for t, we get

t= 2 hrs

His original speed = $\frac{1500}{2} = 750$ kmph

B is the correct answer.

23. **B**

Given,

Cost of each shirt = Rs. 43

Cost of each tie = Rs. 21

Let x, y be the number of shirts and ties purchased

$$x*43 + y*21 = 535$$

$$y = \frac{535 - 43x}{21}$$

when x = 10, y is an integer i.e y = 5

ratio of shirts to ties purchased = 10:5 = 2:1

B is the correct answer.

24. **A**

The cost price of the mixture per kg = $\frac{12 \times 16 + 4 \times 2}{12 + 4}$

= Rs. 12.5

Selling price of the mixture per kg = Rs 16

Profit made on selling 1 kg of mixture = 16-12.5=Rs. 3.5

Profit made on selling 40 kg of mixture = $40 * 3.5$ =Rs. 140

A is the correct answer.

 VIDEO SOLUTION

25. **C**

Here we have two cases:

Case 1: If Y is a member of the committee

We have to select 3 other gentlemen and 3 ladies from 8 ladies and 5 gentlemen (Since If Y is a member of the committee, X will not be a member of the committee)

$$= {}^7C_3 \times {}^6C_3 = 35 * 20 = 700.$$

Case 2: If Y is not a member of the committee

We have to select 4 gentlemen and 3 ladies from 8 ladies and 6 gentlemen (Since Y is not a member of the committee)

$$= {}^8C_3 \times {}^6C_4 = 56 * 15 = 840$$

Total cases = $700 + 840 = 1540$

C is the correct answer.

 VIDEO SOLUTION

SNAP Previous Papers
with detailed video solutions and analysis

26.D

Total no. of seats = 1 grandfather + 5 sons and daughters + 8 grandchildren

$$= 14.$$

The grandchildren can occupy the 4 seats on either side of the table in ${}^8P_4 * 4!$ ways

The grandfather can occupy a seat in $(5-1) = 4$ ways (4 gaps between 5 sons and daughter).

The remaining seats can be occupied in $5! = 120$ ways (5 seats for sons and daughter).

$$\text{Total number of required ways} = 8! * 4 * 120$$

$$= 8! * 480$$

D is the correct answer.

 VIDEO SOLUTION

27.C

Let the total number of chocolates be C

let chocolates received by each child = x

After distributing the sweets equally among 25 children, the number of chocolates left = 8

$$25x+8=C \quad - \text{Eq 1}$$

Had there been 28 children, the number of chocolates that would be required = 22

$$25x+8-22 \text{ should be divisible by } 28 \quad - \text{Eq 2}$$

$25x-14$ should be divisible by 28

$28x-(3x+14)$ should be divisible by 28

$(3x+14)$ should be divisible by 28.

$$\Rightarrow x=14$$

$$\text{The total number of chocolates} = 25x+8 = 25*14+8=358$$

C is the correct answer.

 VIDEO SOLUTION

28.B

Let the distance he has to travel to reach the place = x km

and the time given to reach the place = y minutes.

If he walks 4 km in an hour he is 15 minutes late ie if he walks with a speed 4 km/hour ($4\text{km}/60\text{min}$)he will take $y+15$ minutes

distance = time*speed

$$\text{ie } x = \frac{4}{60} * (y+15)$$

$$60x = 4 * (y+15)$$

$$15x = y+15 \quad - \text{Eq (1)}$$

if he walks 6km in an hour he is 10 minutes early ie if he walks with a speed of 6km/hour he will take y-10 minutes.

$$x = \frac{6}{60} * (y-10)$$

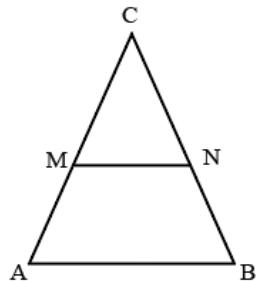

$$10x = (y-10) \quad \text{-- Eq (2)}$$

On solving Eq 1, 2, we get

$$y = 60 \text{ minutes}, x = 5 \text{ km}$$

B is the correct answer.

29. C

We have $MN \parallel AB$

Now let area of CMN be A

so area of $ABMN$ will be $2A$

Now Area of triangle ABC will be $3A$

Now since $MN \parallel AB$

so we can say CMN is similar to CAB

So we can say

$$(CM/CA)^2 = \text{Area of } CMN : \text{Area of } CAB$$

so we can say $CM : CA = 1 : \sqrt{3}$

$$\text{Now therefore } CM : AM = 1 : \sqrt{3} - 1 = \frac{1(\sqrt{3}+1)}{(\sqrt{3}-1)(\sqrt{3}+1)} = \sqrt{3} + 1 : 2$$

30. A

$$\angle DCB = 90^\circ \text{ (Since each angle in a square is } 90^\circ)$$

$$\angle BCE = 60^\circ \text{ (Since each angle in an equilateral triangle is } 60^\circ)$$

$$\angle DCE = 90^\circ + 60^\circ = 150^\circ$$

In $\triangle DCE$, the sides DC and CE are equal, so the angles opposite to them are equal.

$$\angle DCE = \angle CDE = \frac{180-150}{2}$$

$$= 15^\circ$$

A is the correct answer.

SNAP Mock Test

Mocks designed exactly like the actual Exam

$$\frac{\log_{27} 9 \times \log_{16} 64}{\log_4 \sqrt{2}} ?$$

$$= \frac{\log_{3^3} 3^2 \times \log_{2^4} 2^6}{\log_{(\sqrt{2})^4} \sqrt{2}}$$

$$= \frac{\frac{2}{3} \times \frac{6}{4}}{\frac{1}{4}}$$

$$= 4$$

D is the correct answer.

32.A

Let the number of seats in the stadium = x

Number of seats in the lower deck = a and the number of seats in the upper deck be b

$$x=a+b$$

$$a = \frac{x}{4} \text{ and } b = \frac{3x}{4}$$

Now in the lower deck $\frac{4a}{5}$ seats were sold and $\frac{a}{5}$ seats were unsold.

Number of total seats sold in the stadium = $\frac{2x}{3}$

Number of unsold seats in the lower deck = $\frac{a}{5} = \frac{x}{20}$

Number of unsold seats in the stadium = $\frac{x}{3}$

$$\text{Required fraction} = \frac{\frac{x}{20}}{\frac{x}{3}}$$

$$= \frac{3}{20}$$

A is the correct answer.

33.A

Let t be the start time

A starts at t , while B starts at $(t-2)$

Total distance covered = 200 km

As they are travelling in the opposite direction,

Relative distance covered i.e $200=((200/4)*t) + ((400/7)*(t-2))$

$t=176$ min i.e 2hrs 56min from start (6 am)

Therefore they meet at 8.56 am.

A is the correct answer.

34.D

Quantity of water let in by the leak in 1 hr = 15 tonnes

Quantity of water thrown out by the pumps in 1 hr = 12 tonnes

Net quantity of water filled in the ship in 1 hour = $15-12=3$ tonnes

60 tonnes water is filled in = $60/3=20$ hours

Required speed = $40/20=2$ kmph

35.A

Minimum distance will be LCM of 40 cm, 42 cm and 45 cm

$$40 = 2^3 \times 5$$

$$42 = 2 \times 3 \times 7$$

$$45 = 3^2 \times 5$$

$$\text{LCM} = 2^3 \times 3^2 \times 5 \times 7 = 2520 \text{ cm}$$

$$= 25 \text{ m } 20\text{cm}$$

A is the correct answer.

36.A

SNAP Syllabus PDF

cracku

The least number which when divided by 6, 7, 8, 9 and 10 leaves a remainder of 4, 5, 6, 7 and 8 respectively is
 $\text{LCM}(6, 7, 8, 9, 10) - 2$

$$= 2520 - 2 = 2518$$

The number will be in the form of $k * \text{LCM}(6, 7, 8, 9, 10) - 2$

When $k = 3$, the value of $x = 7558$

When $k = 4$, the value of $x = 10078$

So the value of $x = 7558$

Sum of the digits of $x = 7+5+5+8 = 25$

A is the correct answer.

37. A

It is a decreasing AP 25, 24.5, 24, 23.5, ...

The sum will be largest, if n th term is zero then

$$25 + (n-1)(-0.5) = 0$$

$$\Rightarrow n = 51$$

after 51 terms AP contains -ve terms

so, max sum will be obtained upto 50/51th term

$$S = \frac{51}{2} * (25+0) = 637.5$$

 VIDEO SOLUTION

38. C

Total members : 240

$$\text{Males} = \frac{2}{3} (240) = 160$$

$$\text{so Females} = 240 - 160 = 80$$

$$\text{Graduate Males} = 160(0.15) = 24$$

$$\text{Non graduate males} = 160 - 24 = 136$$

$$\text{Graduate Females} = (0.75) 80 = 60$$

$$\text{So non graduate females} = 80 - 60 = 20$$

Now difference between the number of females who are non-graduates and the number of males who are graduates : $24 - 20 = 4$

39. D

Total members = 240

$$\text{Number of males} = \frac{2}{3} \times 240 = 160$$

$$\text{Number of males who are non-graduates} = \frac{85}{100} \times 160 = 136$$

$$\text{Number of females} = \frac{1}{3} \times 240 = 80$$

$$\text{Number of females who are graduates} = \frac{3}{4} \times 80 = 60$$

Sum of male non graduates and female graduates = $136 + 60 = 196$

D is the correct answer.

40. B

Total members in the team = 240

$$\text{Males} = \frac{2}{3} \times 240 = 160$$

$$\text{Females} = \frac{1}{3} \times 240 = 80$$

$$\text{Number of females who are non graduates} = \frac{1}{4} \times 80 = 20$$

ratio between the total number of males and the number of females who are non-graduates

$$= 160:20$$

$$= 8:1$$

B is the correct answer.

Reasoning

41.C

The pattern is as follows:

Previous alphabets of DRINK is CQHMJ respectively, now they have reversed the order, interchanged the first term with last, the second term with second last and so on.

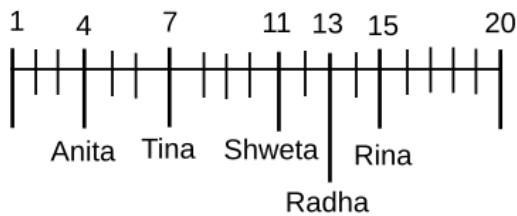

So the term "DRINK" will be JMHQC

Similarly, HONEY will be XDMNG.

Option C

42.B

We can make the following diagram:

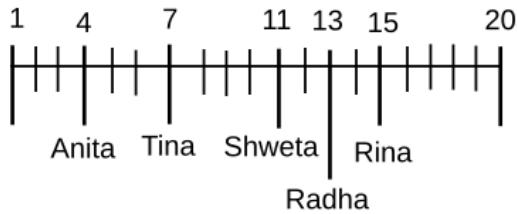

2 people are standing between Anita and Tina.

Option B

43.C

We can make the following diagram:

Option C is correct.

44.A

$$5 \times 4 = 20$$

$$3 \times 8 = 24$$

$$9 \times 4 = 36$$

Option A

45.C

Sum of each column:

$$4, 9, 16, \underline{\quad}, 36 \dots$$

Thus the sum of column 4 = 25

$$2+10+x=25$$

$$x=13$$

Thus, Option C is correct.

46.C

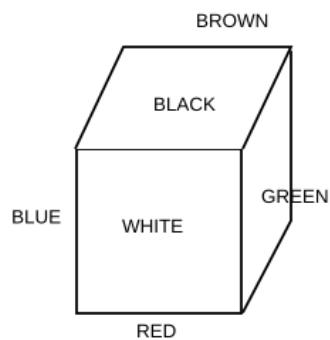

The red side is opposite black.

The green side is between red and black.

The blue side is adjacent to white and the brown side is adjacent to blue.

The red side is face down.

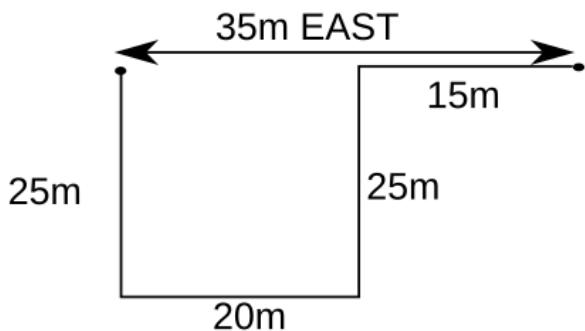

We can draw the following figure:

The side opposite brown is white.

Option C

47.B

The final distance will be 35m.

OPTION B

48.D

UMRSME=Summer

EIWNTR= Winter

PIGRSN= Spring

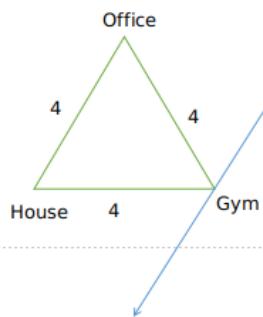

LCUOD=cloud

The last word is the odd one out.

Option D

49.D

The house , the gym and the office forms an equilateral triangle with each side = 4Km.
Now The path covered by shyam will be :

The distance covered will be $4+4+4 = 12\text{km}$

50. C

Every even term increases by 7,14,28...subsequently.

Similarly, every odd term will increase by 9,18,36... if the fifth term is replaced by 38.

Option C

51. B

Every subsequent term is two less than the double of the previous term.

So

$$14=2\times8-2$$

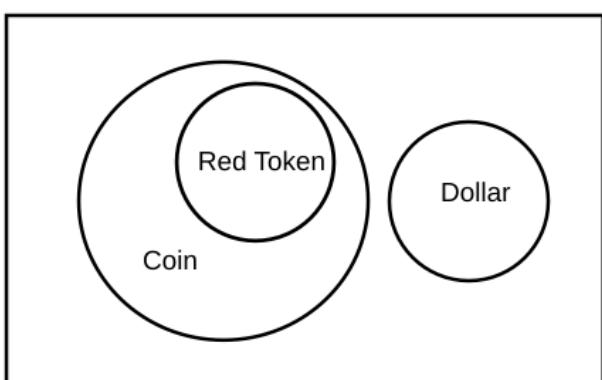

$$26=2\times14-2$$

$$50=2\times26-2$$

Option B

52. B

Here **Statements:** No coin is a dollar. Red token is a coin.

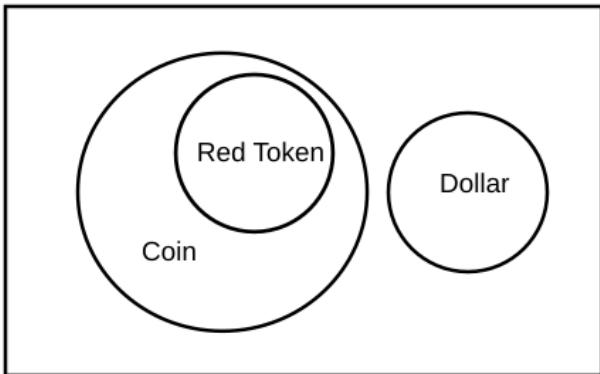

- I. Red token is not a dollar: This statement is definitely true.
- II. Red token may not be a dollar: Ambiguous statement

Option B

53. B

Here **Statements:** No coin is a dollar. Red token is a coin.

- I. Red token is not a dollar: This statement is definitely true.
 II. Red token may not be a dollar: Ambiguous statement

Option B

54. B

e is the set of people who only know Spanish.

$$e = \frac{1}{2}a$$

$$e = 20$$

Option B

55. C

People who can read and write any one language except French = a+c+e

$$a = 40$$

$$c = 2a$$

$$e = (1/2)a$$

$$\text{i.e } 40 + 80 + 20 = 140$$

Option C

56. D

'i' can read and write only in Spanish.

Option D

57. D

'e' represents the staff who speak & write only Spanish

Option D

58. A

b represents the staff who can speak & write English and Russian but cannot in Spanish and French

Option A is correct.

59. B

A watch is a minute slow at 1 p.m. on Tuesday and 2 minutes fast at 1 p.m. on Thursday.

So the watch gains 3 minutes in 48 hours.

It will show the exact time when it would have gained 1 minute from the initial state.

$$1/3 = x/48$$

$$x = 16 \text{ hours.}$$

i.e at 5:00 am Wednesday

Option B

60. C

NOR is coded as 2-3-6, then how should REST

M=1

N=2

O=3

P=4

..

..

REST=6-19-7-8

SNAP Syllabus PDF

61. C

'3a, 2b, 7c' means 'Truth is Eternal'

'7c, 9a, 8b, 3a' means 'Enmity is not Eternal'

'9a, 4d, 2b, 8b' means 'Truth does not perish'.

Eternal= 7c

is = 3a

not = 9a

'Enmity' in that language 8b

Option C

62. B

The sum of the alphabetical order of CONSTABLE =91

STABLE= 19+20+1+2+12+5= 59

Option B

63. C

Ramu has x rupees.

Ravi has x+3 rupees.

Total = $2x+3$

Ramu wins on the horses and triples his money so that he now has Rs 2 more than the original amount of money that the two boys had between them.

$3x = 2x+5$

$\Rightarrow x=5$

Total =13

Option C

64. C

Brother of her mother will be Uncle.

Son of **Brother of her mother** will be Cousins.

Option C

65.D

Total marks obtained in December X = 46

The total marks obtained in June X = 38

Per cent increase= $(46-38)/38 = 21.05\%$

Option D

66.A

The highest percentage increase in marks over the previous periodical exams:

May: 2/35

October: 2/43

December: 1/45

September: 2/41

So may have the highest percentage increase.

Option A

67.D

- A. Holi, Dussehra, Diwali, Guru Nanak Birthday
- B. Shivratri, Christmas, Onam, Eid
- C. Holi, Shivratri, Christmas, Diwali
- D. Holi, Dussehra, Guru Nanak Birthday, Eid
- E. Christmas, Diwali, Onam, Guru Nanak Birthday

Among the given option Pair B and C celebrates Christmas and Onam but not Dussehra and Holi.

Option D

68.B

- A. Holi, Dussehra, Diwali, Guru Nanak Birthday
- B. Shivratri, Christmas, Onam, Eid
- C. Holi, Shivratri, Christmas, Diwali
- D. Holi, Dussehra, Guru Nanak Birthday, Eid
- E. Christmas, Diwali, Onam, Guru Nanak Birthday

A and C does not participate in Eid and Onam but joins in Holi.

69.C

- A. Holi, Dussehra, Diwali, Guru Nanak Birthday
- B. Shivratri, Christmas, Onam, Eid
- C. Holi, Shivratri, Christmas, Diwali
- D. Holi, Dussehra, Guru Nanak Birthday, Eid
- E. Christmas, Diwali, Onam, Guru Nanak Birthday

D enjoys Holi and Eid but not Diwali and Christmas

70.B

From the given series $R > O = A > S$ part will be R>S is a true statement.

General English

71. **B**

The passage is talking about new ideas that have come up and TED is one such idea.

The answer is option B.

72. **A**

The phrase "sepia-toned" in the passage implies a) The end of an era. It describes the world Stanley Fish wrote about—where lectures couldn't be live-tweeted or globally shared online—as outdated, like an old, faded photograph (sepia being a brownish tone associated with vintage images). This suggests that the era has concluded, replaced by modern platforms like TED talks. While b) The way things were is related, it's less precise, and c) and d) focus too narrowly on the pigment or time without capturing the sense of closure. Thus, a) best fits the context.

73. **D**

Even though the passage is about TED, nowhere in the passage author mentioned or implied that TED is irreplaceable.

The answer is option D.

74. **C**

The passage doesn't mention about communists and socialists chasing the spectre.

The answer is option C.

75. **D**

Option D is the right answer.

In the passage, we could infer from the sentence, '*Either they would insist on being something else (whether it is 'liberal,' 'classical liberal,' or 'libertarian'), or they would simply claim to be misunderstood by their opponents.*' that people fear the misuse of the world.

Options A, B and C are not mentioned in the passage.

76. **D**

In last paragraph it is mentioned that neoliberalism can be misunderstood by people.

The answer is option D.

77. **D**

The word "libertarian" in the passage can be best substituted with d) liberal - favouring individual liberty. In the context, "libertarian" is listed alongside "classical liberal" and "conservative" as an identity people prefer over "neoliberal," suggesting it's a distinct ideological stance. Libertarianism is commonly understood as a philosophy emphasizing individual liberty and minimal government intervention, aligning with "liberal - favouring individual liberty." a) neoliberal doesn't fit, as the passage notes people reject that label; b) libertine - immoral refers to moral looseness, not ideology; and c) conservative is a separate category already mentioned. Thus, d) is the most accurate substitution.

78. **B**

aphorisms - pithy observation which contains a general truth

platitudes - remarks or statements with moral content

bombast - high sounding language with less content

adages - proverbs to express truth

In the given context, the appropriate word is platitudes.

The answer is option B.

79. **B**

autocracy - a system of government by one person with absolute power
Among the options, the most appropriate word in the given context is autocratic.
The answer is option B.

80.D

Par excellence - better than all others of same kind
Bete noire - one person or thing one particularly dislikes
Peccadillo - a trifling fault
Magnum Opus - greatest achievement of an artist or writer

Therefore, Option D is the correct answer

SNAP Mock Test
Mocks designed exactly like the actual Exam

81.D

exert - apply or bring to bear
pillage - rob a place using violence
exacerbate - make a problem worse
extricate - free from a constraint or difficulty
In the given context, extricate is the most appropriate word.

The answer is option D.

82.B

Epigraphic: Relating to inscriptions or engravings, often on stone or metal.

Ecology: Study of the relationships between living organisms and their physical environment.

Numismatic: Concerning coins, currency, or medals, especially their history or collection.

Anthropological: Pertaining to the study of human societies, cultures, and their development.

Option B would be the correct answer.

83.D

perused - read in thorough or careful manner.
In the given context, perused is the most appropriate word.
The answer is option D.

84.A

In the given context, overwhelmed and extend are the appropriate set of words. The flood of brilliant ideas has not only overwhelmed us, but has also encouraged us to extend the last date for submission of entries.

The answer is option A.

85.C

In the given context, forced and settle are the appropriate set of words. The high cutoff marks this year have forced college admission seekers to either settle for lesser known colleges or change their subject preferences.

Option A: "Cajoled" is too gentle for the harsh impact of cutoff marks, and "ask" doesn't fit logically or grammatically with "for lesser-known colleges."

Option B: "Pressured" is decent but "sit" is unclear and awkward, lacking a natural connection to choosing colleges.

Option D: "Strained" describes a state, not an action like "forced," and "compromise" feels less idiomatic than "settle" in this context.

The answer is option C.

SNAP Syllabus PDF

86. A

The word "furlough" refers to a temporary leave of absence, especially for soldiers or employees. It is commonly used to describe a break from duty, making "soldiers holiday" the most appropriate synonym. Therefore, Option A is the correct answer.

87. C

punctilious - showing great attention to detail

meticulous - great attention to detail, precise

The answer is option C.

88. B

encomium - speech of praise

verve - enthusiasm

doggerel - words or verse that are badly written

eulogy - a speech or piece of writing that praises someone

The answer is option B.

89. C

Trite - lacking originality or freshness. The antonym of trite is original. Therefore, option C is the correct answer.

"Hackneyed" means overused or clichéd, which is similar to "trite," not opposite.

"Correct" and "Certain" do not relate to the meaning of "trite."

90. B

compassionate - feeling or showing sympathy for others

The antonym of compassionate is unsympathetic

The answer is option B.

91. B

restive - unable to remain still, restless

placid - calm, peaceful, less activity

Therefore, the antonym of restive is placid.

The answer is option B.

92. C

inordinate - unusually large

excessive, considerable and enormous all mean the same, i.e large.

insatiable - impossible to satisfy

The answer is option C.

93. D

Laconic - using very few words

succinct - short or briefly explained

terse, brief and concise all mean the same, i.e. keeping it short.

Abrupt is out of context and does not mean brief, short or crisp.

The answer is option D.

94. D

Sentence d is incorrect. It should be 'are aware of the methods for improving performance and making decisions'.

The answer is option D.

95.B

Sentence b is incorrect. It should be 'and with others who also use the win-win approach'.

The answer is option B.

96.A

Sentence a is incorrect. It should be 'It has always been hard to change the Indian car buyer's perception when it comes to designs'.

The answer is option A.

97.C

The correct answer option is C.

The incorrect phrase is 'and match your non-verbal behaviour', as it should be 'match their non-verbal behaviour'.

98.C

The phrase "also admiration are what" is grammatically incorrect .Therefore, Option C is the correct answer.

The sentence states "To live, to love, to serve"—all are infinitive phrases (verb forms). However, "also admiration" is a noun phrase, which does not match the pattern of the other items in the list.

The correct version would be: "To live, to love, to serve, and also to admire are what I aspire for."

99.D

The first sentence should be the one which introduces the topic. Among the given sentences, only D introduces the topic and talks about dismemberment of the federation. D is followed by B saying which federation is D talking about. B is followed by E, E talks about the reason stating it is because ethnic conflict. E is followed by C which states the real reason, i.e. large difference in quality of life. Therefore, the order is DEBCA.

100.C

First sentence should be the one which introduces the topic. Sentence C introduces the topic, talk about bifurcation of plan and non-plan funds. Sentence E should follow C as it mentions that bifurcation in the budget is artificial. A should follow the sentence E saying though it is artificial, there is some merit in it. Therefore, the order is CEABD.

The answer is option C.

101.D

The first sentence should be the one which introduces the topic. C is the sentence which introduces the topic and talks about non-motorized transport modes and how they have drawn attention. D gives the reason for the point made in the previous statement. B continues the point made by D. It says that they are overlooked as they are considered as relics of backward past. E continues the point made by B and A cites an example for the point made by E. Therefore, the order is CDBEA.

The answer is option D.

102.A

A is incorrect.

Correct sentence: Drug abuse has become one of our most serious social problems.

The answer is option A.

103.D

D is incorrect.

Correct sentence: Alexander Calder, who was originally interested in mechanical engineering later became a sculptor.

The answer is option D.

104. **B**

Statement b is incorrect.

Correct sentence: The sound was taken up by another dog, and then another and another, till, borne on the wind which now sighed softly through the **Pass**, a wild howling began, which seemed to come from all over the country, as far as the imagination could grasp it through the gloom of the night.

The answer is option B.

105. **C**

The part with an error is c) "and during its absence, the horses began to tremble." The pronoun "its" incorrectly refers to "the driver," but "driver" is a person and should be "his" or "her" to match the gender implied earlier. This grammatical mismatch makes c) the erroneous part.

SNAP Mock Test
Mocks designed exactly like the actual Exam

106. **C**

Sentence c is incorrect.

Correct sentence: The house was silent when we got back, save for some poor creature who was screaming away in one of the distant **wards**, and a low, moaning sound from Vinod's room

The answer is option C.

107. **D**

The correct form of indirect speech is 'He wondered where he would be that time the following year'.

Next year will be changed to the following year and shall be.

The answer is option D.

108. **D**

direct speech - today, indirect speech - that day

Therefore, options A and C eliminated.

As the sentence is in simple present tense, in indirect speech it should be in simple past tense. The sentence in option B is in past continuous tense. Therefore, the correct sentence is 'She asked him why he did not go that day.'

The answer is option D.

109. **B**

renaissance - rebirth

The answer is option B.

110. **B**

irreparable - impossible to rectify or repair

The answer is option B.
